CREDIT SUISSE AG

(Translation of registrant's name into English)

Paradeplatz 8, CH 8001 Zurich, Switzerland
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F

Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes

No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

Introduction

This report filed on Form 6-K contains certain information about Credit Suisse AG to be incorporated by reference in the Registration Statement on Form F-3 (file no. 333-180300). Credit Suisse Group AG's financial release for the second quarter of 2013 (Credit Suisse Financial Release 2Q13) is attached as an exhibit to this Form 6-K and was filed with the US Securities and Exchange Commission (SEC) on July 25, 2013. The Bank is incorporating by reference the Credit Suisse Financial Release 2Q13 (except for the sections entitled "Dear shareholders", "Investor information" and "Financial calendar and contacts"). On or about July 31, 2013, Credit Suisse will publish and file with the SEC the Financial Report 2Q13, which will include additional disclosures on (i) investment securities, (ii) loans, allowance for loan losses and credit quality, (iii) long-term debt, (iv) accumulated other comprehensive income, (v) offsetting of financial assets and financial liabilities, (vi) tax, (vii) derivatives and hedging activities, (viii) guarantees and commitments, (ix) transfers of financial assets and variable interest entities, (x) fair value of financial instruments, and (xi) assets pledged and collateral.

Unless the context otherwise requires, reference herein to "Credit Suisse Group", "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries and the term "the Bank" means Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

The Credit Suisse Financial Release 2Q13 contains information for the three and six months ended June 30, 2013. The Group's independent registered public accounting firm has not completed its review of the condensed consolidated financial statements (unaudited) for the three and six months ended June 30, 2013 and the Group has not finalized its Financial Report for the period. Accordingly, such financial information is subject to completion of quarter-end procedures which may result in changes to that information.

Forward-Looking Statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Group's and the Bank's annual report on Form 20-F for the year ended December 31, 2012 (the Credit Suisse 2012 20-F), and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group's and the Bank's reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

¹ Basel III became effective as of January 1, 2013. 4Q12 amounts, which are presented in order to show meaningful comparative information, are calculated as if Basel III had been implemented in Switzerland at such time.

Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

Differences between the Group and the Bank businesses

Entity	Principal business activity
Neue Aargauer Bank	Banking (in the Swiss canton of Aargau)
BANK-now	Private credit and car leasing (in Switzerland)
Financing vehicles of the Group	Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital

² Based on amounts attributable to shareholders.

³ A non-GAAP financial measure. Tangible shareholders' equity is calculated by deducting goodwill and other intangible assets from total shareholders' equity.

⁴ Basel III became effective as of January 1, 2013.

Dear shareholders

Our results for the second quarter and first half of 2013 demonstrate that our business model is performing well and delivering solid revenues, while we continue to make progress in reducing our cost base and balance sheet, thus generating good returns.

For the second quarter of 2013, we delivered Core pre-tax income of CHF 1,534 million, an increase of 38% compared to last year's second quarter, and net income attributable to shareholders of CHF 1,045 million. Our return on equity was 10% for the quarter. For the first half of 2013, we reported Core pre-tax income of CHF 3,356 million, an increase of 192% compared to the first half of last year, net income attributable to shareholders of CHF 2,348 million and a return on equity of 12%. Excluding certain significant items, such as business realignment costs and fair value gains on own debt due to the widening of our own credit spreads, we delivered underlying* Core pre-tax income of CHF 3,587 million, underlying* net income attributable to shareholders of CHF 2,503 million and an underlying* return on equity of 13%.

Our Look-through Swiss Core Capital ratio significantly increased from 9.6% at the end of the first quarter to 10.4% at the end of the second quarter 2013. We are pleased to have exceeded our target of 10% for the middle of this year. Operating under Basel III, we are generating one of the highest returns on equity in our peer group with a strong capital base.

Performance of our businesses in the second quarter

In Private Banking & Wealth Management, we delivered pre-tax income of CHF 917 million for the second quarter of 2013. Net revenues of CHF 3,424 million were stable compared to the second quarter of the previous year, as higher transaction- and performance-based revenues, and higher recurring commissions and fees were offset by lower other revenues and lower net interest income. Total operating expenses of CHF 2,461 million were 3% higher than in the prior-year quarter, mainly driven by an expense provision of CHF 100 million relating to the withholding tax treaty between Switzerland and the UK. Excluding the UK withholding tax charge, Private Banking & Wealth Management pre-tax income was CHF 1,017 million. The cost/income ratio improved to 69% on the same basis. Private Banking & Wealth Management generated net new assets of CHF 7.6 billion in the second quarter, with strong inflows in Wealth Management Clients from emerging markets and from our ultra-high-net-worth individual (UHNWI) client segment, partially offset by continued outflows in Western Europe. The gross margin in Wealth Management Clients improved to 111 basis points from 109 basis points in the prior quarter, mainly reflecting higher transaction- and performance-based revenues and a stable recurring commissions and fees margin.

Brady W. Dougan, Chief Executive Officer (left) and Urs Rohner, Chairman of the Board of Directors.

In Investment Banking, we generated pre-tax income of CHF 754 million – more than double the CHF 314 million recorded in the prior-year quarter. Net revenues of CHF 3,400 million increased 24% compared to the second quarter of 2012, reflecting higher revenues in the majority of our Investment Banking businesses. Total operating expenses of CHF 2,642 million increased 8% compared to the prior-year quarter, driven by higher litigation provisions and increased discretionary performance-related compensation expenses, reflecting higher results. Investment Banking delivered a strong return on Basel III allocated capital of 12% for the second quarter and 18% for the first six months of 2013, double the 9% reported in the first half of 2012 and supporting our through-the-cycle Group return on equity target of above 15%.

Strategic development of our businesses

We have significantly advanced the transformation of our business model. Since the third quarter of 2011, we have reduced our Look-through Basel III risk-weighted assets by CHF 89 billion, achieving our year-end 2013 target of CHF 285 billion six months earlier than planned. Over the past nine months, we have lowered our Swiss leverage exposure by CHF 147 billion as of the end of the second quarter of 2013 and are on track to meet our year-end

2013 target. Furthermore, we have exceeded our Look-through Swiss Core Capital ratio target of 10%.

The transformation of our Private Banking & Wealth Management business is well underway. Over the past six months, we have successfully established the integrated Private Banking & Wealth Management division, have intensified our focus on our core markets and businesses and are further optimizing the way in which we deliver our services and products to our clients. With our improved operating efficiency and our continued focus on targeted growth in the emerging markets and the UHNWI client segment, as well as our efforts to leverage our strong position in our Swiss home market, we are confident that we will achieve our targeted cost/income ratio of 65% and net new asset growth rate of 6% in the Wealth Management Clients business.

We are making continued progress in evolving our business model in Investment Banking in response to the changed market and regulatory environment. Compared to peak levels in the third quarter of 2011, we have reduced the division's risk-weighted assets by USD 112 billion to USD 177 billion and we are thus close to our year-end target of USD 175 billion. As of the end of the

second quarter of 2013, we lowered the Swiss leverage exposure in Investment Banking to USD 909 billion and we are on track to reach our target of USD 840 billion by end-2013. In the first six months of 2013, we improved the cost/income ratio to 72% from 82% in the prior-year period. This demonstrates our successful transition to Basel III, the effectiveness of our diversified business model and our significantly improved capital and operating efficiency.

We would like to thank our shareholders and clients for the trust they have placed in Credit Suisse and, in particular, our employees for their contribution to the success of our business.

Sincerely

Urs Rohner

July 2013

Brady W. Dougan

* Underlying results are non-GAAP financial measures. For a reconciliation of our underlying results to the most directly comparable US GAAP measures, see "Reconciliation to underlying results – Core Results" in I – Credit Suisse results – Information and developments in the 2Q13 financial report.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown herein. The calculation of Investment Banking's return on Basel III allocated capital assumes 30%, 27% and 25% tax rates for 2Q13, 6M13 and 6M12 respectively, as well as capital allocated at 10% of Basel III risk-weighted assets.

110	List of abbreviations
111	Investor information
112	Financial calendar and contacts
113	Cautionary statement regarding forward-looking information

On or about July 31, 2013, we will publish and file with the SEC our Financial Report 2Q13, which will include additional disclosures on:

- investment securities;
- loans, allowance for loan losses and credit quality;
- long-term debt;
- accumulated other comprehensive income;
- offsetting of financial assets and financial liabilities;
- tax;
- derivatives and hedging activities;
- guarantees and commitments;
- transfers of financial assets and variable interest entities;
- fair value of financial instruments; and
- assets pledged and collateral.

For purposes of this report, unless the context otherwise requires, the terms “Credit Suisse,” “the Group,” “we,” “us” and “our” mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term “the Bank” when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of “–” indicates not meaningful or not applicable.

Credit Suisse at a glance

Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and to high-net-worth individuals worldwide, as well as to private clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 46,300 employees from approximately 100 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture diverse growth opportunities around the world. We serve our diverse clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

Private Banking & Wealth Management

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients we serve ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

Investment Banking

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client-driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

Operating environment

Global economic growth was relatively resilient in 2Q13, but weakened in some emerging markets. Equity markets ended the quarter slightly stronger. Bond yields increased significantly, particularly after the US Federal Reserve indicated that it may reduce asset purchases earlier than markets anticipated. Gold prices declined substantially.

Economic environment

The global economy was relatively resilient in 2Q13. According to economic indicators, business activity expanded slightly, though remained subdued. In the US, the impact to date of the automatic government spending cuts was less negative than expected. The US labor market improved, and the housing market continued its recovery. The eurozone economy showed some early signs of stabilization, with some purchasing managers' indices improving to their best levels in more than a year, though still signaling weak conditions. Growth in several emerging economies decelerated. Chinese industrial production and retail sales metrics indicated a slower pace of growth.

The US Federal Reserve (Fed) announced after its June 2013 meeting that it may reduce the pace of its financial asset purchases associated with its quantitative easing program later this year and could discontinue them altogether in mid-2014 if economic conditions evolve as the central bank expects. In early May, the European Central Bank (ECB) cut its main refinancing rate to a historic low of 0.5% and signaled that a negative deposit rate

was an available measure. Concerns continued to be expressed in the EU about tight bank credit conditions faced by small- and medium-sized enterprises, particularly in southern member states of the eurozone. The Bank of Japan (BoJ) announced a massive monetary stimulus program in April in order to achieve a 2% inflation target within two years. As part of the program the monetary base is targeted to almost double by year-end 2014.

After a strong start into the year, many equity markets reversed some of their gains. While cyclical stocks, such as materials and industrials company shares, and emerging markets underperformed due to fears of slowing economic growth, less monetary easing and rising interest rates, US markets and most European markets were resilient overall (refer to the charts "Equity markets"). Exchange-traded volumes on average improved compared to 1Q13 but remained below historical averages. Equity market volatility, as indicated by the Chicago Board Options Exchange Market Volatility Index (VIX), started to increase in June (refer to the charts "Equity markets"). The Dow Jones Credit Suisse Hedge Fund Index increased 0.1% in 2Q13.

Yield curves

Bond yields increased significantly due to uncertainty about the reduction of the Fed asset purchases.

Source: Datastream, Credit Suisse

Equity markets

Equity markets increased slightly in 2Q13. Volatility increased mainly in June.

In fixed income, yields increased significantly over the course of 2Q13, reflecting a change in market expectation with regard to the future course of asset purchases by the Fed (refer to the charts "Yield curves"). The eurozone periphery was also impacted by increasing real yields for German Bunds. However, yields for Italian, Spanish and Portuguese bonds remained below the high levels seen in 2012. Corporate investment grade credit spreads widened moderately in US dollars, while they tightened slightly in euros. High yield and emerging markets credit spreads, however, widened considerably in June given the Fed asset purchasing concerns.

The US dollar showed a mixed performance in 2Q13 against the euro. It initially weakened but rebounded at the end of the quarter with the Fed announcement and the related rise of US yields. Commodity currencies, such as the Australian dollar, weakened sharply against the US dollar, mainly due to a decline in commodity prices. The Swiss franc ended the quarter almost unchanged against the US dollar, but weakened slightly against the euro, mainly due to less demand for safe haven assets. The Japanese yen continued to weaken with increased volatility after the BoJ announced its monetary stimulus program.

Overall, commodity prices declined during the quarter, with the Credit Suisse Commodity Benchmark decreasing more than 7%. Lower inflation expectations triggered significant selling activity in

gold and silver markets, with gold prices declining more than 23%. The West Texas Intermediate oil price was relatively stable. Toward the end of the quarter, agriculture markets weakened amid expectations of increased supply in the current year.

Credit spreads

Credit spreads widened in the second half of 2Q13.

Sector environment

European bank stocks underperformed the broader equity market as measured by the MSCI World index during the quarter, decreasing 4%. North American banks, however, outperformed the broader equity market in 2Q13, increasing 5% (refer to the charts “Equity Markets”).

In private banking, clients continued to be cautious given ongoing market uncertainty with cash deposits remaining high despite low interest rates. The low interest rate environment continued to limit earnings in Swiss retail banking, and concerns about the real estate market overheating in certain areas of Switzerland continued. The wealth management sector continued to adapt to further industry-specific regulatory charges.

In investment banking, global completed mergers and acquisitions (M&A) volumes declined compared to 2Q12 and 1Q13, reflecting subdued industry activity. Global debt underwriting

volumes increased compared to 2Q12, driven by strong high yield volumes and higher investment grade volumes. Volumes declined quarter on quarter, driven by lower investment grade and high yield volumes. Global equity underwriting volumes increased significantly year on year, driven by higher issuance volumes across follow-on offerings, convertibles and initial public offerings (IPOs). Volumes also increased quarter on quarter, primarily due to substantially higher IPO issuance volumes. Global equity trading volumes declined year over year, driven by lower activity in both European and US markets. However, volumes increased quarter on quarter in both US and European markets, reflecting improved trading conditions relative to 1Q13. US fixed income volumes, including treasuries, federal agency, mortgage backed and corporates, were higher year on year and quarter on quarter. The investment banking sector overall continued to adjust its business model as necessitated by regulatory change.

Credit Suisse

In 2Q13, we recorded net income attributable to shareholders of CHF 1,045 million. Diluted earnings per share were CHF 0.52 and return on equity attributable to shareholders was 10.1%.

Core Results

In 2Q13, we recorded net income attributable to shareholders of CHF 1,045 million. Net revenues were CHF 6,904 million and total operating expenses were CHF 5,319 million.

Results in 2Q13 included fair value gains from movements in own credit spreads of CHF 130 million before tax and realignment costs of CHF 133 million before tax.

We recorded net new assets of CHF 7.6 billion in Private Banking & Wealth Management.

Our Basel III CET1 ratio was 15.3% as of the end of 2Q13. Our Swiss Core Capital ratio was 15.7% and our Look-through Swiss Core Capital ratio was 10.4% as of the end of 2Q13.

Results overview

Certain reclassifications have been made to prior periods to conform to the current presentation.

In **Private Banking & Wealth Management**, net revenues of CHF 3,424 million were stable compared to 2Q12, as higher transaction- and performance-based revenues and higher recurring commissions and fees were offset by lower other revenues and lower net interest income. Higher transaction- and performance-based revenues reflected improved client activity with significantly higher brokerage and product issuing fees, and higher carried interest on realized private equity gains, higher equity participations income and higher foreign exchange fees from client transactions. These increases were partially offset by lower performance fees from our Hedging-Griffo subsidiary. Recurring commissions and fees increased 5% due to higher revenues across most revenue categories. Lower other revenues mainly reflected a gain of CHF 66 million from the partial sales of our investment in Aberdeen Asset Management and gains of CHF 41 million related to the sale of a non-core business, both in 2Q12. In a low interest rate environment, net interest income decreased due to significantly lower deposit margins on higher average deposit volumes and slightly higher loan margins on higher average loan volumes.

In **Investment Banking**, net revenues of CHF 3,400 million were up 24% compared to 2Q12. We delivered strong results in 2Q13, with less volatile results from a year ago, reflecting the effectiveness of our diversified and capital efficient Investment Banking business model. Fixed income sales and trading revenues increased compared to 2Q12, driven by higher results across most

of our businesses. 2Q13 was characterized by a strong first half of the quarter, followed by more challenging conditions in the latter part due to market volatility resulting from rising interest rates which had an adverse impact on client activity. Equity sales and trading revenues increased compared to 2Q12, driven by higher client activity, improved market conditions and strong market shares across most of our equities businesses. Underwriting and advisory results were higher compared to 2Q12 as higher debt and equity underwriting revenues were partially offset by lower M&A fees.

► Refer to “Private Banking & Wealth Management” and “Investment Banking” for further information.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, the Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses. In 2Q13, losses before taxes were CHF 137 million, including business realignment costs of CHF 133 million, primarily consisting of severance and other compensation expenses relating to the Group-wide cost efficiency initiatives. 2Q13 results also included fair value gains on our long-term vanilla debt of CHF 17 million, debit valuation adjustments (DVA) gains on certain structured notes liabilities of CHF 79 million and fair value gains on stand-alone derivatives of CHF 34 million, resulting in overall fair value gains on such items of CHF 130 million in the quarter. The fair value gains on own vanilla debt reflected the widening of credit spreads on senior and subordinated debt across most currencies.

► Refer to “Impact from movements in own credit spreads” for further information.

Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and DVA relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

► Refer to “Impact from movements in own credit spreads” in II – Operating and financial review – Core Results in the Credit Suisse Annual Report 2012 for further information.

Provision for credit losses were net provisions of CHF 51 million in 2Q13, with net provisions of CHF 46 million in Private Banking & Wealth Management and CHF 4 million in Investment Banking.

Total operating expenses of CHF 5,319 million were up 4% compared to 2Q12, primarily reflecting 14% higher general and administrative expenses, mainly driven by higher litigation provisions in Investment Banking and an expense provision in Private Banking & Wealth Management of CHF 100 million related to the withholding tax treaty between Switzerland and the UK. Compensation and benefits were stable at CHF 2,961 million compared to 2Q12, as a decrease in salaries was offset by higher pension expenses, both reflecting headcount reductions resulting from our cost efficiency initiatives.

Income tax expense of CHF 475 million recorded in 2Q13 mainly reflected the impact of the geographical mix of results and a tax charge related to re-assessment of a pre-existing deferred tax asset in Switzerland due to changes in earnings-mix assumptions in the current year. Overall, net deferred tax assets decreased CHF 374 million to CHF 6,434 million as of the end of 2Q13 compared to 1Q13. Deferred tax assets on net operating losses decreased by CHF 58 million to CHF 1,857 million during 2Q13. The Core Results effective tax rate was 31.0% in 2Q13, compared to 28.0% in 1Q13.

► Refer to “Note 21 – Tax” in III – Condensed consolidated financial statements – unaudited for further information.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

Assets under management of CHF 1,296.6 billion decreased 1.1% compared to the end of 1Q13, as negative market movements and adverse foreign exchange-related movements were partially offset by solid net new assets. Wealth Management Clients contributed net new assets of CHF 7.5 billion with continued strong inflows from emerging markets and from our ultra-high-net-worth individual (UHNWI) client segment, partially offset by continued outflows in Western Europe. Corporate & Institutional Clients in Switzerland reported outflows of CHF 0.2 billion, driven by a small number of large Swiss institutional clients rebalancing their investment strategy out of some of our index products into cash. Asset Management reported net new assets of CHF 1.5 billion in 2Q13 with inflows mainly in credit, hedge fund and fixed income and equities products and multi-asset class solutions, partially offset by outflows from index strategies and outflows of CHF 1.0 billion from businesses we decided to exit.

Information and developments

Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

As of January 1, 2013, the Basel Committee on Banking Supervision (BCBS) Basel III framework was implemented in

Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our calculations of 4Q12 capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

Key performance indicators

Our key performance indicators (KPIs) for the Group and for our Private Banking & Wealth Management and Investment Banking divisions reflect our strategic plan, the regulatory environment and the market cycle. Income statement-based KPIs are measured on the basis of underlying results, which are non-GAAP financial measures.

- ▶ Refer to “Reconciliation to underlying results – Core Results” for further information on underlying results.
- ▶ Refer to “Key performance indicators” in Private Banking & Wealth Management and Investment Banking for further information on divisional KPIs.

Collaboration revenues

Beginning 2Q13, collaboration revenues are calculated as the percentage of the Group’s net revenues represented by the aggregate collaboration revenues arising when more than one of the

Group's divisions participate in a transaction. Additionally, within the Private Banking & Wealth Management division, collaboration revenues include revenues arising from cross-selling and client referral activities between the Wealth Management Clients and Corporate & Institutional Clients businesses on the one hand and the Asset Management and the securities trading and sales businesses on the other hand. Prior period measures of collaboration revenues were not materially impacted by this change and have

not been restated. Collaboration revenues are measured by a dedicated governance structure and implemented through an internal revenue sharing structure. Only the net revenues generated by a transaction are considered. Position risk related to trading revenues, private equity and other investment-related gains, valuation adjustments and centrally managed treasury revenues are not included in collaboration revenues.

Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. As such, year to date results may be more meaningful than individual quarterly results. Our KPIs are assessed annually as part of our normal planning process and may be revised to reflect our strategic plan, the regulatory environment and market and industry trends.

in / end of	Target	2Q13	6M13	2012
Growth (%)				
Collaboration revenues	18 – 20% of net revenues	17.3	16.1	18.6
Efficiency and performance (%)				
Total shareholder return (Credit Suisse) ¹	Superior return vs. peer group	3.4	15.7	4.8
Total shareholder return of peer group ^{1,2}	–	5.8	8.8	49.2

Core Results cost/income ratio – underlying ³	Below 70%	76.3	73.8	79.8
Capital (%)				
Look-through Swiss Core Capital ratio	Above 10%	10.4	10.4	9.0

¹ Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value at the beginning of the period.

² The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.

³ Measured on the basis of underlying results. Refer to "Reconciliation to underlying results – Core Results" for further information on underlying results.

Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.2 billion in 2013, CHF 3.8 billion by the end of 2014 and CHF 4.4 billion by the end of 2015. These targets are measured against our annualized 6M11 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses. The majority of the expected future savings will be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions. We have also targeted further savings within our two operating divisions. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the creation of the integrated Private

Banking & Wealth Management division, rationalization of front office and support functions, including simplification of our operating platform, streamlining of the offshore affluent and Swiss client coverage model and from announced divestitures. Within Investment Banking, we expect to deliver cost benefits from initiatives already completed in 2012, from continuing to review and realize efficiencies across business lines and geographic regions and from continuing to refine our business mix and align resources with highest returning opportunities. We expect to incur approximately CHF 1.6 billion of business realignment costs associated with these measures during the course of 2013 to 2015.

We incurred CHF 133 million of business realignment costs associated with these measures in 2Q13.

► Refer to "Cost savings and strategy implementation" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2012 for further information.

¹ Core Results include the results of our integrated banking business, excluding revenues and expenses in respect of noncontrolling interests without SEI.

² Includes diversification benefit.

³ Calculated using a return excluding interest costs for allocated goodwill.

⁴ Beginning in 1Q13, segment assets exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

Share issuances

In 2Q13, we issued 200.0 million Group shares out of conditional, conversion and authorized capital in connection with the conversion of mandatory and contingent convertible securities (MACCS). The shares were delivered on April 8, 2013.

At the April 2013 Annual General Meeting (AGM), shareholders approved a distribution in the form of CHF 0.10 per registered share in cash and in the form of new shares with an equivalent value of approximately CHF 0.65 per registered share for the 2012 financial year. As a result, we issued 37.6 million new Group shares out of authorized capital in May 2013.

We also issued 17.1 million new Group shares in connection with share-based compensation awards.

- ▶ Refer to "Additional share information" in III – Condensed consolidated financial statements – unaudited – Note 19 – Accumulated other comprehensive income and additional share information for further information on share issuances.

Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component.

Board of Directors and Management changes

At our AGM in April 2013, shareholders approved the election of Kai S. Nargolwala as a new member to the Board of Directors,

and the re-election of Noreen Doyle and Jassim Bin Hamad J.J. Al Thani, each for a term of three years. Robert H. Benmosche, Aziz R.D. Syriani and David W. Syz retired from the Board of Directors at the AGM 2013.

In July 2013, we announced that effective January 1, 2014 Joachim Oechslein will succeed Tobias Guldemann as Chief Risk Officer and a member of the Executive Board. At such time, Mr. Guldemann will take on a new role as Head of Reputational Risk, Corporate Responsibility and Regulatory Policy, reporting to the Chairman of the Board of Directors.

Regulatory developments and proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

On April 15, 2013, the Fed and the US Federal Deposit Insurance Corporation (FDIC) released additional guidance requiring certain financial companies, including Credit Suisse, to provide additional analysis and data in future resolution plans, and extended the deadline to submit an updated plan from July 1, 2013 to October 1, 2013.

On June 4, 2013, the US Commodity Futures Trading Commission (CFTC) published new rules governing the regulation of swap execution facilities and the application of mandatory trade execution requirements for swaps. We expect that by the end of 2013 as a result of these rules, many or all of the standardized interest rate swaps and index credit default swaps (CDS) that the CFTC currently requires to be cleared will be required to be executed on a swap execution facility or exchange, rather than over-the-counter (OTC).

On July 1, 2013, Credit Suisse Securities (Europe) Limited (CSSEL), the entity through which we conduct certain of our equity swap trading business, registered with the CFTC as a swap dealer.

On July 12, 2013, the CFTC adopted final cross-border guidance and a temporary exemptive order governing the application of CFTC rules to non-US swap dealers, which include Credit Suisse International (CSI) and CSSEL. The guidance adopted by the CFTC allows non-US swap dealers to request substituted compliance, which permits non-US swap dealers to comply with comparable home country rules in lieu of complying with certain CFTC rules. In this regard, the European Commission (EC) and the European Securities and Markets Authority (ESMA) have made an application to the CFTC for substituted compliance on behalf of firms based in the EU, including CSI and CSSEL. Under the CFTC's temporary exemptive order, CSI and CSSEL are not required to comply with certain CFTC requirements applicable to swap dealers for which substituted compliance would be available under the final guidance until the earlier of December 21, 2013 or 30 days after the issuance by the CFTC of a substituted compliance determination. If the CFTC rejects the EC/ESMA application or approves it on terms and conditions less favorable than expected, CSI and CSSEL could be subject to duplicative or conflicting requirements across multiple jurisdictions. In addition, the CFTC's final cross-border guidance is highly complex and includes several concepts that were not readily apparent from the CFTC's earlier proposals regarding the regulation of non-US swap dealers. While we are still evaluating the guidance, we believe it is possible that it could result in an unanticipated expansion of CFTC requirements to our non-US derivatives business or require

us to restructure certain aspects of that business to come into compliance.

On June 27, 2013, the final text of the Capital Requirement Directive IV (CRD IV) was published in the Official Journal of the EU. With effect from January 1, 2014, CRD IV will replace the current CRD directive with new measures implementing Basel III and other requirements. Compliance with these requirements will include receiving certification by the UK's Prudential Regulation Authority of models with respect to regulatory capital requirements of certain of our UK subsidiaries.

In July 2013, the Fed, FDIC and the Office of the Comptroller of the Currency released final capital rules that overhaul the existing US bank regulatory capital rules and implement the Basel III framework and certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The final rules are largely consistent with the Basel III framework published by the BCBS, although they diverge in several important respects due to requirements of the Dodd-Frank Act and do not address other, more recent aspects of the Basel III framework. Although we are not currently subject to US bank regulatory capital standards, if Credit Suisse is required to form an intermediate holding company under the Fed's proposed rule, such company will likely be required to comply with the final capital rules on a stand-alone basis (i.e., without consideration of parental support).

On July 12, 2013, the US Department of the Treasury published a notice postponing the entry into force of the Foreign Account Tax Compliance Act by six months to July 1, 2014.

The Swiss Federal Supreme Court, in a July 2013 decision concerning a former Credit Suisse client, confirmed that so-called group requests which are not targeting an identified client but instead describe a behavioral pattern are permissible under the existing 1996 Swiss/US double taxation treaty for the avoidance of double taxation.

The Swiss Federal Supreme Court issued a decision in 4Q12 in a case brought by a client of another bank seeking reimbursement of commissions paid to the client's bank by providers of investment products. The court ruled that such payments ("retrocessions") received in the context of a discretionary asset management mandate from issuers of investment products are owed to the client (including payments from intra-group companies) unless a client waiver is in place. The Swiss Financial Market Supervisory Authority FINMA (FINMA) subsequently issued a notice requiring all banks to inform potentially affected clients and we have done so by informing all of our discretionary mandate clients in 2Q13. Based on our current evaluation, we expect no material exposure from this decision.

Reconciliation to underlying results – Core Results

Underlying results are non-GAAP financial measures that exclude valuation impacts from movements in own credit spreads and certain other items included in our reported Core Results. Management believes that underlying results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our underlying Core Results to the most directly comparable US GAAP measures.

► Refer to “Core Results”, “Private Banking & Wealth Management” and “Investment Banking” in this report and prior Financial Reports for the periods indicated for further information.

Allocations and funding

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements, which aim to reflect the pricing structure of unrelated third-party transactions, govern the compensation received by one segment for generating revenue or providing services on behalf of another. Corporate services and business support are provided by the Shared Services area and these costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

We centrally manage our funding activities, with new securities for funding and capital purposes issued primarily by the Bank which lends funds to our operating subsidiaries and affiliates. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital. Transfer pricing, using market rates, is used to record net revenues and expenses relating to this funding in each of the segments, and our businesses are also credited to the extent they provide long-term stable funding.

- ▶ Refer to "Allocations and funding" in II – Operating and financial review – Core Results in the Credit Suisse Annual Report 2012 for further information.

Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

The Financial Report 2Q13, including additional disclosures on fair value of financial instruments, will be published on our website and filed with the US Securities and Exchange Commission (SEC) on or about July 31, 2013.

- ▶ Refer to "Note 1 – Summary of significant accounting policies" and "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information.

Personnel

Headcount at the end of 2Q13 was 46,300, down 600 from 1Q13 and down 1,900 from 2Q12. The decrease in 2Q13 primarily reflected headcount reductions resulting from our cost efficiency initiatives.

Number of employees by division

		end of		% change	
	2Q13	1Q13	2Q12	QoQ	YoY
Number of employees by division (full-time equivalents)

Number of employees	46,300	46,900	48,200	(1)	(4)

Private Banking & Wealth Management

In 2Q13, we reported income before taxes of CHF 917 million and net revenues of CHF 3,424 million.

Net revenues were higher compared to 1Q13, reflecting higher transaction- and performance-based revenues and higher recurring commissions and fees. Compared to 2Q12, net revenues were stable, as higher transaction- and performance-based revenues, reflecting improved client activity, and higher recurring commissions and fees were offset by lower other revenues and lower net interest income.

Provision for credit losses were CHF 46 million on a net loan portfolio of CHF 214 billion.

Total operating expenses increased compared to 1Q13 and 2Q12, mainly driven by an expense provision relating to the withholding tax treaty between Switzerland and the UK.

In 2Q13, assets under management were CHF 1,296.6 billion, 1.1% lower compared to 1Q13. We attracted net new assets of CHF 7.6 billion.

¹ Includes investment-related gains/(losses), equity participations and other gains/(losses) and fair value gains/(losses) on the Clock Finance transaction.

² Wealth Management Clients covers individual clients, including affluent, high-net-worth and ultra-high-net-worth individual clients.

³ Adjusted to reflect relationship managers in mortgage centers in Switzerland.

Results detail

The following provides a comparison of our 2Q13 results versus 2Q12 (YoY) and versus 1Q13 (QoQ).

Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based

income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

YoY: Stable at CHF 3,424 million

Net revenues were stable as higher transaction- and performance-based revenues and higher recurring commissions and fees were offset by lower other revenues and lower net interest income. Higher transaction- and performance-based revenues reflected improved client activity with significantly higher brokerage and product issuing fees, and higher carried interest on realized private equity gains, higher equity participations income and higher foreign exchange fees from client transactions. These increases were partially offset by lower performance fees from our Hedging-Griffo subsidiary. Recurring commissions and fees increased 5% due to higher revenues across most revenue categories. Lower other revenues mainly reflected a gain of CHF 66 million from the partial sales of our investment in Aberdeen Asset Management and gains of CHF 41 million related to the sale of a non-core business, both

in 2Q12. In a low interest rate environment, net interest income decreased due to significantly lower deposit margins on higher average deposit volumes and slightly higher loan margins on higher average loan volumes.

QoQ: Up 4% from CHF 3,285 million to CHF 3,424 million

Higher net revenues reflected higher transaction- and performance-based revenues, higher recurring commissions and fees and slightly higher net interest income partially offset by lower other revenues. Transaction- and performance-based revenues increased 16%, driven by higher equity participations income, higher carried interest on realized private equity gains and the semi-annual performance fees from Hedging-Griffo, partially offset by lower private equity placement fees and lower trading and sales income. Higher recurring commissions and fees reflected higher investment account and services fees and higher asset management fees, partially offset by lower banking services fees. Slightly higher net interest income reflected slightly lower deposit margins and higher loan margins on slightly higher average deposit and loan volumes. The decrease in other revenues reflected lower investment-related gains and a gain in 1Q13 on the sale of JO Hambro Investment Management (JO Hambro).

Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

YoY: Up 15% from CHF 40 million to CHF 46 million

Provision for credit losses increased, mainly reflecting higher new provisions in Corporate & Institutional Clients, driven by isolated cases. Wealth Management Clients recorded net provisions of CHF 20 million and Corporate & Institutional Clients recorded net provisions of CHF 26 million in 2Q13.

QoQ: Up 64% from CHF 28 million to CHF 46 million

Provision for credit losses was higher in both Wealth Management Clients and Corporate & Institutional Clients mainly reflecting higher new provisions driven by the isolated cases in Corporate & Institutional Clients. In 1Q13, Wealth Management Clients recorded net provisions of CHF 19 million while Corporate & Institutional Clients recorded net provisions of CHF 9 million.

Operating expenses

Compensation and benefits

YoY: Down 4% from CHF 1,412 million to CHF 1,353 million

The decrease in compensation and benefits reflected lower salary expenses, mainly driven by lower headcount resulting from our ongoing efficiency measures.

QoQ: Down 2% from CHF 1,379 million to CHF 1,353 million

Slightly lower compensation and benefit expenses primarily reflected lower deferred compensation expense from prior year awards and lower discretionary performance-related compensation accruals.

General and administrative expenses

YoY: Up 14% from CHF 783 million to CHF 896 million

The increase in general and administrative expenses primarily reflected a 2Q13 expense provision of CHF 100 million related to the withholding tax treaty between Switzerland and the UK, whereby Swiss banks were collectively obliged to fund CHF 500 million as a guarantee for client regularization payments above a minimum level of CHF 800 million. As announced by the Swiss Bankers Association, the amount of undeclared assets held by UK citizens and liable for the payment is substantially less than originally estimated by the Swiss banking industry, and it cannot be excluded that the banks' guarantee payment will not, or only to a very limited extent, be reimbursed through client regularization payments under the treaty. In accordance with the allocation key of the guaranteed amount provided under Swiss law, we would bear 20% of the ultimate cost. The recorded expense provision represents the full amount of that expected cost.

QoQ: Up 13% from CHF 794 million to CHF 896 million

The increase was driven by the expense provision related to the withholding tax treaty between Switzerland and the UK.

Key performance indicators

We target a divisional cost/income ratio of 65% measured on the basis of underlying results for the Private Banking & Wealth Management division. Underlying results are non-GAAP financial measures. In 2Q13, the underlying cost/income ratio was 71.9%, stable compared to 2Q12 and down one percentage point from 1Q13. The underlying cost/income ratio further excluding the expense provision of CHF 100 million related to the withholding tax treaty would be 68.9%.

- ▶ Refer to table "Reconciliation to underlying results – Private Banking & Wealth Management" for further information on underlying results.

We also target net new asset growth of 6% for both the Wealth Management Clients and Asset Management businesses. In 2Q13, the annualized quarterly growth rates in Wealth Management Clients and Asset Management were 3.6% and 1.5%, respectively.

Cost/income ratio (KPI) – Underlying

Assets under management

Assets under management continued to reflect a risk-averse asset mix, with investments in less complex, lower-margin products and a significant portion of assets in cash and money market products.

Assets under management of CHF 1,296.6 billion decreased 1.1% compared to the end of 1Q13, as negative market movements and adverse foreign exchange-related movements were

partially offset by solid net new assets. Wealth Management Clients contributed net new assets of CHF 7.5 billion with continued strong inflows from emerging markets and from our UHNWI client segment, partially offset by continued outflows in Western Europe. Corporate & Institutional Clients in Switzerland reported outflows of CHF 0.2 billion, driven by a small number of large Swiss institutional clients rebalancing their investment strategy out of some of our index products into cash. Asset Management reported net new assets of CHF 1.5 billion in 2Q13 with inflows mainly in credit, hedge fund and fixed income and equities products and multi-asset class solutions, partially offset by outflows from index strategies and outflows of CHF 1.0 billion from businesses we decided to exit.

Assets under management were 6.9% higher compared to the end of 2Q12, primarily driven by positive market movements and net new assets.

Business developments

On July 1, 2013, the sale of Credit Suisse's exchange-traded funds (ETF) business to BlackRock was completed. Related gains of approximately CHF 140 million will be recognized in 3Q13.

In April 2013 we announced an agreement to sell Strategic Partners, Credit Suisse's dedicated secondary private equity business, to Blackstone. The transaction is expected to close in 3Q13.

Reconciliation to underlying results – Private Banking & Wealth Management

Underlying results are non-GAAP financial measures that exclude certain items that management does not consider representative of our underlying performance. Provided below is a reconciliation of underlying results for the Private Banking & Wealth Management division to the most directly comparable US GAAP measures. For more information, see Private Banking & Wealth Management in this report and prior Financial Reports for the periods indicated.

¹ Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients.

Wealth Management Clients

Net revenues

Net interest income

YoY: Down 7% from CHF 855 million to CHF 794 million

Lower net interest income reflected significantly lower deposit margins and stable loan margins on higher average deposit and loan volumes.

QoQ: Up 4% from CHF 762 million to CHF 794 million

Higher net interest income reflected stable deposit margins on slightly higher average deposit volumes and higher loan margins on slightly higher average loan volumes.

Recurring commissions and fees

YoY: Up 6% from CHF 771 million to CHF 815 million

Higher recurring commissions and fees reflected higher investment account and services fees, mainly from security account fees, higher investment product management fees, including higher funds management fees, and higher discretionary mandate management fees.

QoQ: Up 4% from CHF 782 million to CHF 815 million

Higher recurring commissions and fees mainly reflected higher investment account and services fees, primarily from security account fees, and higher investment product management fees, partially offset by lower banking services fees due to lower account statement fees.

Transaction- and performance-based revenues

YoY: Up 15% from CHF 631 million to CHF 728 million

Higher transaction- and performance-based revenues mainly reflected improved client activity with significantly higher brokerage and product issuing fees, and higher equity participations income, primarily from the dividend of CHF 36 million from our ownership interest in SIX Group AG, and higher foreign exchange fees from client transactions. These increases were partially offset by lower performance fees from Hedging-Griffo and lower revenues from integrated solutions.

QoQ: Up 11% from CHF 654 million to CHF 728 million

The increase was mainly driven by higher equity participations income, primarily from the dividend from our ownership interest in SIX Group AG, higher foreign exchange fees from client transactions, the semi-annual performance fees from Hedging-Griffo and higher brokerage and product issuing fees.

Gross margin

Our gross margin was 111 basis points in 2Q13, eight basis points lower compared to 2Q12, mainly reflecting a continued adverse interest rate environment and the impact from the growth in our UHNWI client segment where we have lower gross margins but higher profitability. Compared to 1Q13, the gross margin increased by two basis points, mainly reflecting higher transaction- and performance-based revenues. Average assets under management increased 8.8% and 2.5% compared to 2Q12 and 1Q13, respectively.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation. The impact on the gross margins in 1Q13 and 2Q12 was a reduction of one basis point.

¹ Reflects gains related to the sale of JO Hambro in 1Q13 and gains related to the sale of a non-core business from the integration of Clariden Leu in 2Q12.

² Net revenues divided by average assets under management.

¹ Reflects fair value losses on the Clock Finance transaction.

Corporate & Institutional Clients

Net revenues

Net interest income

YoY: Down 6% from CHF 303 million to CHF 285 million

The decrease reflected significantly lower deposit margins on higher average deposit volumes and higher loan margins on higher average loan volumes.

QoQ: Stable at CHF 285 million

Stable net interest income reflected lower deposit margins on higher average deposit volumes and higher loan margins on slightly higher average loan volumes.

Recurring commissions and fees

YoY: Stable at CHF 115 million

Stable recurring commissions and fees reflected lower discretionary mandate management fees offset by higher banking services fees and higher investment product management fees.

QoQ: Up 2% from CHF 113 million to CHF 115 million

Slightly higher recurring commissions and fees included higher investment account and services fees, higher banking services fees and lower investment product management fees.

Transaction- and performance-based revenues

YoY: Up 9% from CHF 120 million to CHF 131 million

The increase primarily reflected higher foreign exchange fees from client transactions, higher revenues from integrated solutions and higher equity participations income.

QoQ: Up 2% from CHF 129 million to CHF 131 million

Transaction- and performance-based revenues were slightly higher as higher foreign exchange fees from client transactions and higher revenues from integrated solutions were partially offset by lower trading and sales income.

Asset Management

Net revenues

Fee-based revenues

YoY: Up 11% from CHF 478 million to CHF 531 million

The increase primarily reflected higher carried interest on realized private equity gains and higher asset management fees, partially offset by lower equity participations income. The increase in asset management fees reflected higher average assets under

management resulting from positive market performance and asset inflows. The lower equity participations income was primarily due to the sale of our ownership interest in Aberdeen in 2012.

QoQ: Up 18% from CHF 450 million to CHF 531 million

The increase primarily reflected higher carried interest on realized private equity gains, performance fees, and asset management fees, partially offset by lower private equity placement fees. The increase in performance fees reflected semi-annual performance fees from Hedging-Griffo.

Investment-related gains/(losses)

YoY: Up 4% from CHF 27 million to CHF 28 million

In 2Q13, gains of CHF 28 million included gains in private equity investments in the energy sector and losses in the technology sector. In 2Q12, gains of CHF 27 million reflected gains in private equity investments mainly in the commodities and financial sectors, offset in part by losses in the energy sector.

QoQ: Down 68% from CHF 88 million to CHF 28 million

In 2Q13, gains of CHF 28 million included gains in private equity investments in the energy sector and losses in the technology sector. In 1Q13, gains of CHF 88 million reflected gains in private equity investments, mainly in the energy, real estate and retail sectors and in hedge fund investments, and included a gain of CHF 13 million in connection with the sale of a private equity investment.

Equity participations and other gains/(losses)

YoY: Down from CHF 69 million to zero

The gain in 2Q12 primarily resulted from the sale of 32.2 million shares of our ownership interest in Aberdeen.

³ Primarily private equity investments.

Investment Banking

In 2Q13, we reported income before taxes of CHF 754 million and net revenues of CHF 3,400 million. We delivered strong results in 2Q13, with less volatile results from a year ago, reflecting the effectiveness of our diversified and capital efficient Investment Banking business model.

Fixed income sales and trading revenues increased compared to 2Q12, driven by higher results across most of our businesses, although lower compared to a seasonally strong 1Q13. 2Q13 was characterized by a strong first half of the quarter, followed by more challenging conditions in the latter part due to market volatility resulting from rising interest rates which had an adverse impact on client activity.

Equity sales and trading revenues increased compared to 2Q12 and 1Q13, driven by higher client activity, improved

market conditions and strong market shares across most of our equities businesses.

Underwriting and advisory results were higher compared to 2Q12 as higher debt and equity underwriting revenues were partially offset by lower M&A fees. Compared to 1Q13, results increased driven by higher revenues across debt and equity underwriting and advisory.

Compensation and benefits increased by CHF 58 million, or 4%, compared to 2Q12, primarily due to higher discretionary performance-related compensation expense, reflecting higher results. Compared to 1Q13, compensation and benefits were stable. Total other operating expenses increased 13% compared to 2Q12, mainly due to higher litigation provisions. Compared to 1Q13, total other operating expenses were stable.

Risk-weighted assets (USD)	177	182	202	(3)	(12)	177	202	(12)

¹ As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our calculations of Basel III risk-weighted assets are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. For dates prior to January 1, 2013, we have estimated risk-weighted assets as if the Basel III framework had been implemented in Switzerland as of such date.

Key performance indicators

We target a divisional cost/income ratio of 70% based on underlying results for the Investment Banking division. Underlying results are non-GAAP financial measures that exclude certain items included in our reported results that management considers not representative of our underlying performance. There were no underlying adjustments to reported results for the Investment Banking division in 2Q13, 1Q13 and 2Q12. The cost/income ratio was 77.7% in 2Q13, compared to 67.2% in 1Q13 and 89.1% in 2Q12.

Cost/income ratio (KPI) – Underlying

--- Target is a cost/income ratio of 70% measured on the basis of underlying results.

Results detail

The following provides a comparison of our 2Q13 results versus 2Q12 (YoY) and versus 1Q13 (QoQ).

Net revenues

Debt underwriting

YoY: Up 78% from CHF 300 million to CHF 535 million

The increase was primarily driven by higher revenues from leveraged finance, reflecting substantially higher global industry-wide high yield issuance volumes and increased market share. We also had higher revenues from emerging markets, especially in Brazil and structured lending. In addition, we had higher investment grade revenues due to higher industry-wide issuance volumes and increased market share.

QoQ: Up 16% from CHF 461 million to CHF 535 million

The increase was primarily due to higher revenues from leveraged finance despite a decline in global industry-wide high-yield issuance volumes. We also had higher revenues from emerging markets, especially in Brazil and structured lending. The increase was partially offset by lower revenues from investment grade, reflecting lower global industry-wide investment grade issuance volumes.

Equity underwriting

YoY: Up 123% from CHF 93 million to CHF 207 million

The increase reflects substantially higher revenues from follow-on offerings, reflecting market share gains and higher global industry-wide issuance activity. We also had higher revenues from IPOs, reflecting higher global industry-wide issuance activity. In addition, we had improved results from convertibles.

QoQ: Up 32% from CHF 157 million to CHF 207 million

The increase was primarily driven by higher revenues from IPOs, reflecting higher global industry-wide issuance activity.

Advisory and other fees

YoY: Down 29% from CHF 234 million to CHF 167 million

The decrease was primarily due to significantly lower M&A fees driven by lower global industry-wide completed M&A volumes and a decrease in market share.

QoQ: Up 15% from CHF 145 million to CHF 167 million

The increase was driven by higher M&A fees as a significant improvement in our global completed M&A market share helped offset lower global industry-wide completed M&A volumes. We also had higher restructuring advisory fees.

Fixed income sales and trading

YoY: Up 13% from CHF 1,108 million to CHF 1,257 million

Fixed income sales and trading revenues increased, driven by higher results across most of our businesses, reflecting improved trading conditions compared to 2Q12. Global credit products revenues increased driven by strong leveraged finance performance. We also had higher revenues in securitized products, reflecting strong results in non-agency residential mortgage-backed securities (RMBS) and asset finance. Revenues from foreign exchange improved as higher market volatility led to increased client activity. Commodities revenues increased, reflecting improved trading results, and global rates results were stable, although they remained at subdued levels as difficult market conditions led to lower client activity. These increases were partially offset by lower results in emerging markets driven by a weaker financing environment and volatile trading conditions in June. In 2Q13, we incurred a loss of CHF 34 million from businesses we are exiting, compared to CHF 139 million in 2Q12. At the end of the quarter, fixed income Basel III risk-weighted assets totaled USD 112 billion, a reduction of USD 25 billion, or 18%, from a year ago.

QoQ: Down 37% from CHF 1,987 million to CHF 1,257 million

Fixed income sales and trading revenues declined compared to a seasonally strong 1Q13. Emerging markets revenues were lower, driven by weaker financing activity and a deterioration in trading conditions, particularly in June. We had lower revenues in global credit products, including leveraged finance and investment grade, due to the sudden shift in market pricing in June, although results remained strong. Results include lower global rates revenues, driven by reduced client flows. We also had lower revenues from corporate lending and foreign exchange, reflecting significant risk reduction by clients at the end of the quarter. We had higher commodities revenues and solid securitized products performance, with stable revenues, despite difficult trading conditions in June. We incurred a loss of CHF 34 million from businesses we are exiting compared to a gain of CHF 4 million in 1Q13. At the end of the quarter, fixed income Basel III risk-weighted assets decreased USD 4 billion, or 3%, from 1Q13.

Equity sales and trading

YoY: Up 24% from CHF 1,075 million to CHF 1,338 million

The increase was driven by substantially higher results in derivatives, reflecting increased client activity and stronger trading results, particularly in Asia and the US. In addition, 2Q12 derivatives results were negatively impacted by subdued client activity in Asia and our conservative risk positioning. We also had higher results from equities arbitrage trading. Cash equities revenues increased as market share gains in the US and Europe more than offset lower industry trading volumes. We also had higher results

in convertibles. Prime services revenues were lower as strong performance in prime brokerage, driven by market share momentum, was more than offset by lower financing revenues, particularly in Europe.

QoQ: Up 3% from CHF 1,297 million to CHF 1,338 million

The increase was driven by higher prime services revenues, reflecting continued strong market share. We also had higher revenues in derivatives, reflecting higher global trading volumes. Convertibles revenues increased due to improved trading conditions compared to 1Q13. Cash equities revenues were lower, following a strong performance in 1Q13, especially in Asia.

Operating expenses

Compensation and benefits

YoY: Up 4% from CHF 1,408 million to CHF 1,466 million

The increase was primarily driven by higher discretionary performance-related compensation expense, reflecting higher results, offsetting a decline in salaries due to lower headcount.

QoQ: Down 1% from CHF 1,485 million to CHF 1,466 million

The decrease was primarily due to lower deferred compensation from prior-year awards, largely offset by higher discretionary performance-related compensation expense.

General and administrative expenses

YoY: Up 15% from CHF 812 million to CHF 934 million

The increase was primarily due to higher litigation provisions.

QoQ: Up 2% from CHF 915 million to CHF 934 million

The increase was driven by a higher UK bank levy accrual as 1Q13 included certain credit adjustments to this accrual relating to prior years. Excluding the UK bank levy accrual, expenses were flat.

Market share momentum

- Credit Suisse retained its #1 rankings in US Electronic Trading and US Program Trading and maintained a Top 3 ranking in US Equity Trading, according to the latest *Greenwich Associates* survey.
- Credit Suisse was voted the #1 Prime Broker in Europe by *EuroHedge* magazine for the fourth consecutive year. For the first time in a decade, Credit Suisse was voted the #2 Prime Broker in Asia by *AsiaHedge*. Credit Suisse advanced to the #3 rank in the Americas in the Absolute Return 2013 Prime Brokerage League Table, compared to #4 in 2012.
- In the 2013 fixed income trading survey for North America by *Greenwich Associates*, Credit Suisse advanced to the #1 rank in overall US Fixed Income by market share. Broadly, we increased or maintained market share in several key businesses, including a #1 rank in US Securitized Products.

Evolving the Investment Banking business model

Our business model has continued to evolve in response to the new market and regulatory environment. We have achieved our Investment Banking balance sheet target of less than USD 600 billion of assets, reporting assets of USD 594 billion as of the end of 2Q13. In addition, we are on track to meet our Swiss leverage exposure target of USD 840 billion by year-end 2013. We reported USD 909 billion as of the end of 2Q13, down USD 150 billion from 2Q12, improving the Group's Swiss leverage ratio.

Assets under management

We had net asset inflows of CHF 7.6 billion during 2Q13 and assets under management of CHF 1,296.6 billion as of the end of 2Q13.

Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Assets under management of CHF 1,296.6 billion were 1.1% lower compared to the end of 1Q13, as negative market movements and adverse foreign exchange-related movements were

partially offset by solid net new assets. Compared to the end of 2Q12, assets under management were CHF 83.5 billion higher, primarily driven by positive market movements and net new assets.

▶ Refer to "Private Banking & Wealth Management" in I – Credit Suisse results and "Note 36 – Assets under management" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management.

¹ Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.

² Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients.

Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

Private Banking & Wealth Management recorded net new assets of CHF 7.6 billion in 2Q13. Wealth Management Clients contributed solid net new assets of CHF 7.5 billion with continued strong inflows from emerging markets and from our UHNWI client segment, partially offset by continued outflows in Western Europe.

Corporate & Institutional Clients in Switzerland reported outflows of CHF 0.2 billion, driven by a small number of large Swiss institutional clients rebalancing their investment strategy out of some of our index products into cash. Asset Management reported net new assets of CHF 1.5 billion in 2Q13 with inflows mainly in credit, hedge fund and fixed income and equities products, and multi-asset class solutions, partially offset by outflows from index strategies and outflows of CHF 1.0 billion from businesses we decided to exit.

Liquidity and funding management

During 2Q13, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

Overview

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our internal liquidity risk management framework is subject to review and monitoring by the FINMA, other regulators and rating agencies.

- ▶ Refer to “Treasury management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2012 for further information on liquidity and funding management.

Liquidity risk management framework

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. The assets included in the liquidity pool consist of cash, high grade bonds, major market equity securities and other liquid securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top rated counterparties. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). The BCBS has stated that it will continue to review the effect of these liquidity standards on financial markets, credit extension and economic growth to address unintended consequences.

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019 following an observation period which began in 2011, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank’s assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. Pursuant to our plans announced in October 2012 to reduce our balance sheet by the end of 2013 to below CHF 900 billion on a foreign exchange neutral basis compared to the end of 3Q12, we further strengthened our long-term funding profile to accelerate the increase of our NSFR. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 2Q13. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making in Switzerland. Both quantitative and qualitative requirements are consistent with existing FINMA liquidity requirements.

Funding sources and uses

We primarily fund our balance sheet through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency and geography and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent. Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

These assets include our liquidity pool, which as of the end of 2Q13 based on our internal model was CHF 132 billion, net of a stress test level haircut. The liquidity pool consisted of CHF 40 billion of cash held at major central banks, primarily the Fed, the Swiss National Bank (SNB) and the ECB, CHF 57 billion of securities issued by governments and government agencies, primarily of the US, Germany, France and Britain and CHF 35 billion of other highly liquid assets including equity securities that form part of major indices.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 22% as of the end of 2Q13, slightly higher compared to the end of 1Q13, reflecting slightly lower loans and slightly higher core customer deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments and a haircut for the illiquid portion of securities, with long-term debt and equity, where we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 293 billion as of the end of 2Q13, a slight increase compared to CHF 291 billion as of the end of 1Q13, as a result of a growth in the customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and long-standing relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

- ▶ Refer to the chart "Balance sheet funding structure" and "Balance sheet and off-balance sheet" for further information.

Balance sheet funding structure

as of June 30, 2013 (CHF billion)

Reverse repurchase agreements	102	Match funded	121	Repurchase agreements

Assets	920		920	Liabilities and Equity	

¹ Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.
² Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.
³ Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.
⁴ Excludes loans with banks.
⁵ Excludes due to banks and certificates of deposit.

Debt issuances and redemptions

Our capital markets debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, Australian dollar domestic medium-term note programs, a Samurai shelf registration statement in Japan and covered bond programs. As a global bank, we have access to multiple markets worldwide and our major funding centers are Zurich, New York, London and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekar-institute, one of two institutions established by a 1930 act of the Swiss parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

In 2Q13, senior debt of CHF 6.8 billion, subordinated debt of CHF 0.9 billion and domestic covered bonds of CHF 375 million matured. As of June 30, 2013, we had CHF 14.6 billion of domestic and international covered bonds outstanding.

As of the end of 2Q13, the weighted average maturity of long-term debt was 6.4 years (including certificates of deposit with a

maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

The percentage of unsecured funding from long-term debt, excluding non-recourse debt associated with the consolidation of variable interest entities (VIEs), was 22% as of the end of 2Q13, compared to 24% as of the end of 1Q13.

Credit ratings

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.7 billion, CHF 4.1 billion and CHF 5.8 billion, respectively, as of the end of 2Q13, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller. On July 2, 2013 Standard & Poor announced a one-notch rating downgrade.

As of the end of 2Q13, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

- ▶ Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management in the Credit Suisse Annual Report 2012 for further information.

Capital management

Our capital position remained strong with a CET1 ratio under Basel III of 15.3% as of the end of 2Q13, reflecting an increase of CHF 0.8 billion in CET1 capital and a reduction in RWA compared to the end of 1Q13. Our Look-through Swiss Core Capital ratio was 10.4% as of the end of 2Q13.

Regulatory capital framework

Overview

Effective January 1, 2013, the Basel II.5 framework, under which we operated in 2012, was replaced by the Basel III framework, which was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business. Our 4Q12 calculations of capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

- ▶ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2012 for further information.

Capital structure under Basel III

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards will be phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

- ▶ Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum common equity tier 1 (CET1) requirement is 4.5% of risk-weighted assets (RWA).

In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions.

Capital frameworks for Credit Suisse

¹ As of September 30, 2013, banks will be required to hold CET1 capital in the amount of 1% of RWA pertaining to mortgage loans that finance residential property in Switzerland.

² The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA.

³ Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.

Basel III phase-in requirements for Credit Suisse

Effective January 1, for the applicable year	2013	2014	2015	2016	2017	2018	2019
Capital ratios							
Minimum CET1	3.5% ¹	4.0% ¹	4.5%	4.5%	4.5%	4.5%	4.5%

Capital instruments subject to phase out		Phased out over a 10-year horizon beginning 2013 through 2022					

¹ Indicates transition period.

² Includes goodwill and other intangible assets, certain deferred tax assets and participations in financial institutions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

The CET1 capital will be subject to certain regulatory deductions and other adjustments to common equity, including deduction of deferred tax assets for tax-loss carry-forwards, goodwill and other intangible assets and investments in banking and finance entities.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Beginning January 1, 2013, capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

Swiss requirements

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss requirements). Together with

the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in from 2013 through 2018 and are fully effective January 1, 2019. The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

▶ Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.

The buffer requirement is 8.5% and can be met with additional CET1 capital of 5.5% of RWA and a maximum of 3% of high-trigger buffer capital notes (BCN). The high-trigger BCN are required to convert into common equity or be written off in the event the CET1 ratio falls below 7%.

The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. Based on these parameters, FINMA determines the progressive component on an annual basis. For 2013, FINMA set our progressive component requirement at 4.41% compared to our previously reported progressive component of 4.92%. The progressive component may be met with CET1 capital or low-trigger contingent capital, which converts into common equity or is written off if the CET1 ratio falls below 5%. In addition, until the end of 2017, the progressive component may also be met with high-trigger BCN.

Similar to Basel III, the Swiss requirements include a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth. In February 2013, upon the request of the SNB, the Swiss Federal Council activated the countercyclical capital buffer, which will require banks to hold CET1 capital in the amount of 1% of their RWA pertaining to mortgage loans that finance residential property in Switzerland beginning on September 30, 2013.

We also measure Swiss Core Capital and Swiss Total Capital. Swiss Core Capital consists of CET1 capital and tier 1 participation securities, which FINMA advised may be included with

a haircut of 20% until December 31, 2018 at the latest, and may include certain other Swiss adjustments. Our Swiss Total Capital consists of Swiss Core Capital, high-trigger BCN and low-trigger contingent capital.

As of January 1, 2013, we must also comply with a leverage ratio applicable to Swiss systemically relevant banks (Swiss leverage ratio). This leverage ratio must be at least 24% of each of the respective minimum, buffer and progressive component requirements. Since the ratio is defined by reference to capital requirements subject to phase-in arrangements, the ratio will also be phased in.

Swiss capital and leverage ratio phase-in requirements for Credit Suisse

as of 2013

¹ The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. Using 2012 year-end data, we estimate that the 2019 progressive component will be further reduced in 2014.

Risk measurement models

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR) and, since January 1, 2013, advanced credit valuation adjustment (CVA). The incremental risk charge is a regulatory capital charge for default and migration risk on positions in the trading books and is intended to complement additional standards being applied to the VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group's current portfolio taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk. Advanced CVA covers the risk of mark-to-market losses on the expected counterparty risk arising from changes in a counterparty's credit spreads.

FINMA, in line with Bank for International Settlements (BIS) requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. For the purposes of this measurement, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions. In 2Q13, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

With FINMA approval, we have implemented a Comprehensive Risk Measure framework to calculate a capital charge covering all price risks (default, spread and correlation risk) within the credit correlation products within our trading book portfolio.

Effective January 1, 2013, FINMA introduced increased capital charges for mortgage loans that finance certain residential property in Switzerland (mortgage multiplier). These increased capital charges, which are applied for both BIS and FINMA purposes, will be phased in by January 1, 2019.

- ▶ Refer to "Market risk" in Risk management for further information on Credit Suisse's risk measurement models and backtesting exceptions.

Capital issuances and redemptions

In July 2012, we issued CHF 3.8 billion of MACCS that mandatorily converted into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013. The settlement and delivery of shares occurred on April 8, 2013.

Capital metrics under Basel III

Regulatory capital and ratios – Group

Our CET1 ratio was 15.3% as of the end of 2Q13, compared to 14.6% as of the end of 1Q13. Our tier 1 ratio was 15.9% as of the end of 2Q13 compared to 15.1% as of the end of 1Q13, reflecting increased CET1 capital and a reduction in RWA. Our total capital ratio was 18.2% as of the end of 2Q13 compared to 17.4% as of the end of 1Q13, reflecting increased CET1 capital and a reduction in RWA.

CET1 capital was CHF 44.4 billion as of the end of 2Q13 compared to CHF 43.6 billion as of the end of 1Q13, reflecting net income, partially offset by a quarterly dividend accrual and a negative foreign exchange translation impact.

Additional tier 1 capital increased slightly to CHF 1.6 billion and tier 2 capital was stable at CHF 6.9 billion as of the end of 2Q13.

Total eligible capital was CHF 52.8 billion as of the end of 2Q13 compared to CHF 52.0 billion as of the end of 1Q13.

RWA decreased 3%, from CHF 298.2 billion as of the end of 1Q13 to CHF 289.7 billion as of the end of 2Q13, reflecting decreases in credit risk and market risk together with a small decrease resulting from foreign exchange translation.

The decrease in credit risk was primarily driven by a decrease in advanced CVA and a decrease in Private Banking & Wealth Management credit risk, partially offset by an increase in Investment Banking credit risk. The decrease in advanced CVA resulted from decreases in counterparty exposure and increases in hedging. Investment Banking credit risk increases reflected increases in secured financing exposures and lending, partially offset by updates to loss given default parameters and decreases in derivative exposures. The decrease in market risk related primarily to Investment Banking, which had lower equity and fixed income exposures particularly impacting stressed VaR and VaR.

¹ Basel III became effective as of January 1, 2013. 4Q12 amounts, which are presented in order to show meaningful comparative information, are calculated as if Basel III had been implemented in Switzerland at such time.

² Converted and settled into 233.5 million shares on April 8, 2013 and reflected in total shareholders' equity as of that date.

³ Includes regulatory adjustments not subject to phase in, including a cumulative dividend accrual.

⁴ Includes regulatory adjustments not subject to phase in, including the cumulative dividend accrual, and an adjustment for tier 1 participation securities.

⁵ Includes an adjustment for the accounting treatment of pension plans pursuant to phase-in requirements and other regulatory adjustments. For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions).

⁶ Consists of high-trigger BCN.

⁷ Includes tier 1 participating securities and hybrid capital instruments that are subject to phase out.

⁸ Includes goodwill and other intangible assets of CHF 8.8 billion and other capital deductions, including gains/(losses) due to changes in own credit risks on fair valued financial liabilities, that will be deducted from CET1 once Basel III is fully implemented.

CET1 capital movement – Basel III

	2Q13	1Q13
CET1 capital (CHF million)		
Balance at beginning of period	43,581	41,500 ¹
Net income	1,045	1,303
Foreign exchange impact	(157)	800
Other	(39) ²	(22)
Balance at end of period	44,430	43,581

¹ Basel III became effective as of January 1, 2013. 4Q12 amounts, which are presented in order to show meaningful comparative information, are calculated as if Basel III had been implemented in Switzerland at such time.

² Reflects the effect of share-based compensation, a dividend accrual and a change in other regulatory adjustments.

Look-through CET1 ratio

For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions). Assuming fully phased-in deductions of CHF 8.8 billion of goodwill and other intangible assets and CHF 7.5 billion of other regulatory adjustments, we estimate that our CET1 ratio as of the end of 2Q13 would be 9.3%, calculated based on Look-through RWA of CHF 281 billion.

Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both the balance sheet and the off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in Credit Risk RWA. Operational risk RWA reflect the

capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty-risk RWA primarily reflect the capital requirements for our premises and equipment. It is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

Risk-weighted assets and capital ratios – Basel III

¹ Basel III became effective as of January 1, 2013. 4Q12 amounts, which are presented in order to show meaningful comparative information, are calculated as if Basel III had been implemented in Switzerland at such time.

Capital metrics under Swiss requirements

Swiss Core and Total Capital ratios

Swiss Core Capital consists of CET1 capital, tier 1 participation securities which FINMA advised may be included with a haircut of 20% until December 31, 2018 at the latest, and may include

certain other adjustments. Swiss Total Capital also includes high-trigger BCN and low-trigger contingent capital. As of the end of 2Q13, our Swiss Core Capital and Swiss Total Capital ratios were 15.7% and 17.2%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.0% and 8.1%, respectively.

Look-through Swiss Core and Total Capital ratios

The Look-through Swiss Core Capital assumes fully phased-in goodwill and other intangible assets and other regulatory adjustments. We have calculated the pro forma Look-through Swiss

Core Capital assuming the successful completion of the remaining CHF 0.6 billion of capital measures announced in July 2012. As of the end of 2Q13, our pro forma Look-through Swiss Core Capital ratio was 10.6% compared to a 10.0% ratio that we are targeting.

Look-through CET1, Swiss Core and Total Capital ratios

Note: Pro forma calculation assumes successful completion of the remaining capital measures announced in July 2012. Refer to "July 2012 capital measures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual report 2012 for further information. Actual results may differ. Rounding differences may occur.

¹ Consists of existing tier 1 participation securities of CHF 2.5 billion and other Swiss regulatory adjustments.

² Consists of strategic divestments that are part of our capital measures announced in July 2012 to strengthen our capital position.

³ Reflects increased regulatory thresholds resulting from the remaining capital measures.

Swiss leverage ratio

The Swiss leverage ratio is calculated as Swiss Total Capital, divided by a three-month average exposure, which consists of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments,

including cash collateral netting reversals and derivative add-ons. As of the end of 2Q13, our Swiss leverage ratio was 3.9%. As of the end of 2Q13, our total exposure was CHF 1,258 billion and we are targeting a reduction in our total exposure to under CHF 1,190 billion by the end of 2013.

Total shareholders' equity

Our total shareholders' equity increased to CHF 42.4 billion as of the end of 2Q13 compared to CHF 37.8 billion as of the end of 1Q13. Total shareholders' equity was impacted by the issuance of common shares, primarily for the settlement of MACCS, net income and treasury share sales and repurchases. These

increases were offset by dividend payments and the impact of foreign exchange-related movements on cumulative translation adjustments.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

¹ Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

Risk management

In 2Q13, overall position risk increased 4%, utilized economic capital increased 1%, average risk management VaR in US dollars decreased 2% and gross impaired loans decreased 6% to CHF 1.7 billion.

Economic capital and position risk

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In 2Q13, there were no changes to the economic capital methodology.

- ▶ Refer to “Economic capital and position risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on economic capital and position risk.

Key position risk trends

Position risk for risk management purposes as of the end of 2Q13 increased 4% compared to the end of 1Q13. Position risk increased mainly due to new loans and increased counterparty risk in Investment Banking in international lending & counterparty exposures. Position risk also increased in loans collateralized by securities in private banking corporate & retail lending. These increases were partially offset mainly by lower foreign exchange, interest rate and credit spread exposures in fixed income trading as well as lower RMBS exposures in real estate & structured assets due to sales.

Position risk

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange and commodity exposures.

² This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.

³ Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Compared to the end of 2Q12, position risk for risk management purposes increased 6%, mainly due to new loans in Investment Banking in international lending & counterparty exposures, higher private banking corporate & retail lending, driven by increased risk in loans collateralized by securities, and increased emerging markets country event risk primarily from higher exposures in Eastern Europe. These increases were partially offset by lower interest rate and foreign exchange exposures in fixed income trading, lower commercial mortgage-backed securities (CMBS) and RMBS

exposures in real estate & structured assets due to sales, and private equity sales in equity trading & investments.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ Includes primarily high-trigger BCN, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to Look-through CET1 capital to enable comparison between economic capital utilization and economic capital resources under the Basel III framework.

² Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, interest rate risk on treasury positions, diversification benefits and an estimate for the impacts of certain methodology changes planned for 2013.

³ Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital.

⁴ Includes a diversification benefit of CHF 19 million, CHF 20 million, CHF 19 and CHF 23 million as of the end of 2Q13, 1Q13, 4Q12 and 2Q12, respectively.

⁵ Includes a diversification benefit of CHF 19 million, CHF 19 million, CHF 10 and CHF 22 million as of the end of 2Q13, 1Q13, 4Q12 and 2Q12, respectively.

Utilized economic capital trends

In 2Q13, our utilized economic capital increased 1%.

For Private Banking & Wealth Management, utilized economic capital decreased 1%, mainly due to decreased deferred share-based compensation awards and owned real estate risk in other risks, partially offset by higher private banking corporate & retail lending position risk.

For Investment Banking, utilized economic capital increased 2%, mainly due to increases in international lending & counterparty exposures and higher reserves within other risks for risks not captured in the position risk economic capital model, partially offset by decreased deferred share-based compensation awards within other risk and lower position risk in fixed income trading and real estate & structured assets.

For Corporate Center, utilized economic capital was stable.

Market risk

Trading portfolios

We primarily assume market risk through the trading activities in Investment Banking. Private Banking & Wealth Management also engages in trading activities, but to a much lesser extent. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations. Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

Trading risks are measured using VaR along with a number of other risk measurement tools. VaR measures the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon at a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt

changes in market conditions. We use risk management VaR for internal risk management purposes and regulatory VaR for regulatory capital purposes. For risk management VaR, we use a one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. Our VaR methodology is the same for both VaR measures, except for the confidence levels and holding periods. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 2Q13, there were no material changes to the VaR methodology.

For regulatory capital purposes, we operate under the Basel III market risk framework which includes an incremental risk charge, stressed VaR and, since January 1, 2013, consideration of the impact of changes in a counterparty's credit spreads (also known as credit valuation adjustments).

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information.

In order to show the aggregate market risk in our trading books, the chart entitled "Daily risk management VaR" shows the trading-related market risk on a consolidated basis.

We measure VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR decreased 2% to USD 42 million from 1Q13, mainly reflecting reduced interest rate exposures. Compared to 2Q12, average risk management VaR decreased 34% due to lower market volatility and reduced interest rate, credit spread, foreign exchange and equity exposures.

Period-end risk management VaR decreased 13% to USD 34 million from 1Q13. The decrease mainly reflected lower market volatility and lower interest rate and foreign exchange exposures. Compared to 2Q12, period-end risk management VaR decreased 47%, mainly reflecting lower market volatility and reduced interest rate, credit spread and equity exposures.

Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in 2Q13 and in the 12-month-period ending with such quarter. Since there were fewer than five backtesting exceptions in the rolling 12-month period ending as of the end of 2Q13, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital

for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

- ▶ Refer to “Risk measurement models” in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 2Q13 with those for 1Q13 and 2Q12. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 2Q13 and 1Q13, we had no trading loss days.

Daily risk management VaR

Actual daily trading revenues

Excludes Neue Aargauer Bank. Periods prior to the integration of Clariden Leu in the second quarter of 2012 also exclude Clariden Leu. Trading revenues do not include valuation adjustments associated with counterparty and own credit exposures.

Banking portfolios

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking & Wealth Management and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 9.6 million as of the end of 2Q13, compared to a valuation increase of CHF 9.0 million as of the end of 1Q13.

Credit risk

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from

counterparty exposure arising from derivatives, foreign exchange and other transactions.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance.

- ▶ Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on credit risk.
- ▶ Refer to "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information on counterparty credit risk.

Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our OTC derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table is presented on a risk-based view. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes CDS and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions, each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps).

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the

origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranching CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable ISDA master agreement that provides for daily margining.

Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Cyprus, Greece, Ireland, Italy, Portugal and Spain as of the end of 2Q13 was EUR 3.8 billion, down from EUR 4.1 billion as of the end of 1Q13. Our net exposure to these sovereigns was EUR 0.7 billion, up from EUR 0.6 billion as of the end of 1Q13. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 2Q13 included net exposure to financial institutions of EUR 1.4 billion and to corporates and other counterparties of EUR 2.9 billion, compared to EUR 2.2 billion and EUR 2.7 billion, respectively, as of the end of 1Q13. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each respective country.

Sovereign debt rating developments

In 2Q13, the long-term sovereign debt ratings of the countries listed in the table were affected as follows: Fitch lowered Cyprus' rating to B- from B and increased Greece's rating to B- from CCC. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

¹ Includes other hedges (derivative instruments), guarantees, insurance and collateral.

² Represents long inventory positions netted at issuer level.

³ Substantially all of which results from CDS; represents long positions net of short positions.

Credit risk overview

The following table represents credit risk from loans, loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or

credit hedges. Loan commitments include irrevocable credit facilities for Investment Banking and Private Banking & Wealth Management and unused credit limits which can be revoked at our sole discretion upon notice to the client in Private Banking & Wealth Management.

Before risk mitigation, for example, collateral, credit hedges.

¹ Positive replacement value after netting agreements.

² Includes CHF 141 billion, CHF 142 billion, CHF 140 billion and CHF 135 billion of unused credit limits as of the end of 2Q13, 1Q13, 4Q12 and 2Q12, respectively, which were revocable at our sole discretion upon notice to the client.

Loan exposure

Compared to the end of 1Q13, gross loans decreased CHF 2.8 billion to CHF 247.2 billion. In Private Banking & Wealth Management, gross loans were CHF 215.1 billion, up CHF 2.0 billion from 1Q13, primarily reflecting increases in loans collateralized by securities and residential mortgages. Gross loans in Investment Banking decreased CHF 4.9 billion to CHF 32.0 billion, mainly due to decreases in loans to financial institutions, governments and public institutions, and lower commercial and industrial loans.

Gross impaired loans decreased 6% to CHF 1.7 billion compared to the end of 1Q13. In Private Banking & Wealth Management, gross impaired loans decreased CHF 104 million to CHF 1,419 million due to lower potential problem, non-performing and non-interest-earning loans. In Investment Banking, gross impaired loans decreased CHF 6 million to CHF 252 million.

We recorded a net provision for credit losses of CHF 51 million in 2Q13, compared to a net provision of CHF 22 million in 1Q13, with a net provision of CHF 46 million and CHF 4 million in Private Banking & Wealth Management and Investment Banking, respectively.

Compared to the end of 2Q12, gross loans increased 3%. An increase in Private Banking & Wealth Management of 6% was primarily due to an increase in loans collateralized by securities, higher residential mortgages and higher commercial and industrial loans. In Investment Banking, a decrease of 13% was mainly related to lower loans to financial institutions, and lower commercial and industrial loans. Gross impaired loans decreased 6% driven by decreases in potential problem loans across the Group.

¹ Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking.

² Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 66,934 million, CHF 65,929 million and CHF 63,496 million as of the end of 2Q13, 1Q13 and 2Q12, respectively.

³ Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value.

Balance sheet and off-balance sheet

Total assets were CHF 919.9 billion, total liabilities were CHF 870.5 billion and total equity was CHF 49.4 billion. Both total assets and total liabilities were down 3% for the quarter, driven in both cases by a decrease from operating activities, including our balance sheet reduction initiative, and the foreign exchange translation impact. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

Balance sheet

Total assets were CHF 919.9 billion as of the end of 2Q13, down CHF 26.7 billion, or 3%, from the end of 1Q13, reflecting measures taken in connection with our balance sheet reduction initiative announced in October 2012 and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets decreased CHF 22.9 billion.

Compared to the end of 1Q13, trading assets decreased CHF 18.4 billion, or 7%, driven by decreases in debt and equity securities, partially offset by an increase in derivative instruments. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions decreased CHF 7.1 billion, or 4%, primarily due to a decrease in reverse repurchase transactions. Net loans decreased CHF 2.8 billion, or 1%, reflecting decreases in loans to financial institutions, governments and public institutions and commercial and industrial loans in Investment Banking, partially offset by increases in loans collateralized by securities and residential mortgages in Private Banking & Wealth Management. Cash and due from banks was stable at CHF 56.6 billion. Brokerage receivables increased CHF 13.7 billion, or 23%, mainly due to higher cash collateral requirements under the Dodd-Frank Act. All other assets decreased CHF 11.5 billion, or 8%, including a decrease of CHF 11.5 billion in securities received as collateral.

Total liabilities were CHF 870.5 billion as of the end of 2Q13, down CHF 31.2 billion, or 3%, from the end of 1Q13, driven by a decrease from operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities decreased CHF 28.6 billion.

Compared to the end of 1Q13, central bank funds purchased, securities sold under repurchase agreements and securities lending transactions decreased CHF 28.1 billion, or 22%, primarily reflecting a decrease in repurchase transactions. Long-term debt decreased CHF 9.6 billion, or 7%, mainly reflecting maturing of

senior and subordinated debt, partly offset by issuances of senior debt. Due to banks decreased CHF 5.6 billion, or 16%, mainly driven by a decrease in demand deposits from commercial banks. Trading liabilities decreased CHF 1.6 billion, or 2%, reflecting a decrease in short trading positions, partially offset by an increase in derivative instruments. Brokerage payables increased CHF 17.9 billion, or 24%, mainly due to the higher cash collateral requirements. Customer deposits increased CHF 11.7 billion, or 4%, mainly driven by an increase in certificates of deposits. All other liabilities decreased CHF 16.0 billion, or 14%, including decreases of CHF 11.5 billion in obligations to return securities received as collateral and CHF 3.7 billion in short-term borrowings.

- ▶ Refer to “Funding sources and uses” in Liquidity and funding management and “Capital management” for further information, including our funding of the balance sheet and the leverage ratio.

Off-balance sheet

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

- ▶ Refer to “Liquidity and funding management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2012 and “Note 25 – Guarantees and commitments” and “Note 29 – Litigation” in III – Condensed consolidated financial statements – unaudited for further information.

Condensed consolidated financial statements – unaudited

On or about July 31, 2013, we will publish and file with the SEC our Financial Report 2Q13, which will include additional disclosures on:

- investment securities;
- loans, allowance for loan losses and credit quality;
- long-term debt;
- accumulated other comprehensive income;
- offsetting of financial assets and financial liabilities;
- tax;
- derivatives and hedging activities;
- guarantees and commitments;
- transfers of financial assets and variable interest entities;
- fair value of financial instruments; and
- assets pledged and collateral.

Notes to the condensed consolidated financial statements – unaudited

Note 1 Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2012 included in the Credit Suisse Annual Report 2012.

- ▶ Refer to “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of the Group’s significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period’s consolidated financial statements to conform to the current period’s presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods

presented, except with respect to the additional disclosures on investment securities, loans, allowance for loan losses and credit quality, long-term debt, accumulated other comprehensive income, offsetting of financial assets and financial liabilities, tax, derivatives and hedging activities, guarantees and commitments, transfers of financial assets and VIEs, fair value of financial instruments, and assets pledged and collateral. These disclosures will be included in the Financial Report 2Q13 to be published on the Group’s website and filed with the SEC on or about July 31, 2013. The 1Q13 consolidated statements of operations and comprehensive income, the 1Q13 and 2Q12 consolidated balance sheets and the 2Q13, 1Q13 and 2Q12 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2 Recently issued accounting standards

Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

- ▶ Refer to “Note 2 – Recently issued accounting standards” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of accounting standards adopted in 2012.

ASC Topic 210 – Balance Sheet

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, “Disclosures about Offsetting Assets and Liabilities” (ASU 2011-11), an update to Accounting Standards Codification (ASC) Topic 210 – Balance Sheet. The amendments in ASU 2011-11 require an

entity to prepare additional disclosures about offsetting and related arrangements. In January 2013, the FASB issued ASU 2013-01, “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11. The adoption of ASU 2011-11 and ASU 2013-01 on January 1, 2013 did not have an impact on the Group’s financial position, results of operations or cash flows.

ASC Topic 220 – Comprehensive Income

In January 2013, the FASB issued ASU 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income” (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide

information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. The adoption of ASU 2013-02 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU 2011-05, "Presentation of Comprehensive Income" (ASU 2011-05), an update to ASC Topic 220 – Comprehensive Income. ASU 2011-05 provides the entity with an option to present total comprehensive income either in a single continuous statement or in two separate but consecutive statements. The adoption of ASU 2011-05 on January 1, 2012 did not have an impact on the Group's financial position, results of operations or cash flows.

ASC Topic 360 – Property, Plant and Equipment

In December 2011, the FASB issued ASU 2011-10, "Derecognition of in Substance Real Estate – a Scope Clarification, a consensus of the FASB Emerging Issues Task Force" (ASU 2011-10), an update to ASC Topic 360 – Property, Plant and Equipment. The ASU specifies that the guidance in ASC Subtopic 360-20, Property, Plant and Equipment – Real Estate Sales, would apply to an entity that ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's non-recourse debt. The adoption of ASU 2011-10 on July 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon

Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective prospectively for interim and annual reporting periods beginning after December 15, 2013 with early adoption permitted. The Group elected to early adopt ASU 2013-05 on January 1, 2013 which did not have a material impact on the Group's financial position, results of operations or cash flows.

Standards to be adopted in future periods

ASC Topic 946 – Financial Services

– Investment Companies

In June 2013, the FASB issued ASU 2013-08, "Amendments to the Scope, Measurement, and Disclosure Requirements" (ASU 2013-08) an update to Topic 946 – Financial Services – Investment Companies. The amendments change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company and provide comprehensive guidance for assessing whether an entity is an investment company. ASU 2013-08 is effective for interim and annual reporting periods beginning after December 15, 2013. The Group is currently evaluating the impact of adoption of ASU 2013-08 on the Group's financial position, results of operations or cash flows.

Note 3 **Business developments and subsequent events**

On July 1, 2013, the sale of Credit Suisse's ETF business to BlackRock was completed. Related gains of approximately CHF 140 million will be recognized in 3Q13.

In April 2013, Credit Suisse announced an agreement to sell Strategic Partners, Credit Suisse's dedicated secondary private equity business, to Blackstone. The transaction is expected to close in 3Q13.

On April 8, 2013, Credit Suisse Group AG settled and delivered 233,452,670 of Group shares in connection with the conversion of CHF 3.8 billion of MACCS. Those shares consisted of 199,964,015 newly issued shares and 33,488,655 treasury shares. Settlement of the MACCS with registered shares utilizing authorized capital decreased debt liabilities and increased shareholders' equity.

Note 4 **Discontinued operations**

The Group did not discontinue any material operations in 2Q13.

Note 5 **Segment information****Overview**

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments.

In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses. Beginning in 1Q13, segment assets exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

- ▶ Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on segment information, revenue sharing and cost allocation, funding and taxes.

Weighted-average shares outstanding for basic/diluted earnings per share available for mandatory convertible securities¹	20.4	231.8	–	126.1	–
Earnings per share available for common shares (CHF)					
Basic earnings per share available for common shares	0.54	0.76	0.46	1.31	0.51
Diluted earnings per share available for common shares	0.52	0.75	0.44	1.28	0.49

Prior periods have been adjusted to reflect the increase in the number of shares outstanding that arose from the 2Q13 stock dividend, as required under US GAAP.

¹ Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

² Reflects changes in the fair value of the PAF2 units which are reflected in the net profit of the Group until the awards are finally settled.

³ Reflects weighted-average shares outstanding on PAF2 units.

⁴ Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 12.1 million, 13.7 million, 23.5 million, 12.9 million and 26.0 million for 2Q13, 1Q13, 2Q12, 6M13 and 6M12, respectively.

Note 14 **Trading assets and liabilities**

end of	2Q13	1Q13	4Q12	2Q12

Cash collateral received	13,047	13,399	12,224	12,978

¹ Recorded as cash collateral netting on derivative instruments in Note 24 – Derivatives and hedging activities.

² Recorded as cash collateral on derivative instruments in Note 17 – Other assets and other liabilities.

Note 15 **Investment securities**

The required disclosures for investment securities will be included in the Financial Report 2Q13, which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

Note 16 **Loans, allowance for loan losses and credit quality**

Loans are divided in two portfolio segments, “consumer” and “corporate & institutional”. Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if

the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

► Refer to “Note 18 – Loans, allowance for loan losses and credit quality” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on loans, allowance for loan losses, credit quality and impaired loans.

The required disclosures on loan purchases, reclassifications and sales, credit quality and impaired loans will be included in the Financial Report 2Q13, which will be published on the Group’s website and filed with the SEC on or about July 31, 2013.

Loans

Credit quality of loans held at amortized cost

Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to

reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

- ▶ Refer to “Credit quality of loans held at amortized cost” in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2012 for further information on internal ratings and the scope of the credit quality disclosures.

Impaired loans

- ▶ Refer to “Impaired loans” in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2012 for further information on impaired loan categories and allowance for specifically identified credit losses on impaired loans.

Note 20 Offsetting of financial assets and financial liabilities

The required disclosures for offsetting of financial assets and financial liabilities will be included in the Financial Report 2Q13,

which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

Note 21 Tax

The income tax expense of CHF 475 million recorded in 2Q13 mainly reflected the impact of the geographical mix of results and a tax charge relating to the re-assessment of a pre-existing deferred tax asset in Switzerland due to changes in earnings-mix assumptions in the current year. Overall, net deferred tax assets decreased CHF 374 million to CHF 6,434 million as of the end of 2Q13 compared to 1Q13. The decrease in net deferred tax assets primarily related to earnings.

The presentation of net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities is in accordance with ASC Topic 740 – Income Taxes guidance to interim reporting. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of June 30, 2013, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 7.0 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including

the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 3 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; Brazil – 2008; Japan – 2008; the UK – 2006; the US – 2006; and the Netherlands – 2005.

Additional information on tax will be included in the Financial Report 2Q13, which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

Note 22 **Employee deferred compensation**

The Group's current and previous deferred compensation plans include share awards, performance share awards, Plus Bond awards, Partner Asset Facilities awards, Adjustable Performance Plan awards, Restricted Cash Awards, Scaled Incentive Share Units (SISUs), Incentive Share Units (ISUs) and other cash awards.

- ▶ Refer to "Note 27 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

The following tables show the expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 2013 and prior periods and the associated remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized deferred compensation expense was based on the fair value of each award on the date of grant and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

Deferred compensation expense

Note 24 Derivatives and hedging activities

The required disclosures for derivatives and hedging activities and related contingent credit risk will be included in the Financial Report 2013, which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

- ▶ Refer to "Note 30 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

Note 25 Guarantees and commitments

Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

- ▶ Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a detailed description of guarantees.

Securities lending indemnifications	12,211	0	12,211	12,211	0	12,211
Derivatives ²	21,197	14,218	35,415	35,415	985	– ³
Other guarantees	4,297	1,122	5,419	5,397	3	2,812
Total guarantees	52,969	22,194	75,163	74,016	1,180	20,279

¹ Total net amount is computed as the gross amount less any participations.

² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

³ Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered

by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program

for the period July 1, 2012 to June 30, 2013 was CHF 0.7 billion. These deposit insurance guarantees were reflected in other guarantees. For the period July 1, 2013 to June 30, 2014, the Group's share in the deposit insurance guarantee program based on FIN-MA's estimate will be CHF 0.6 billion.

PAF2 transaction

The Group's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Group. In 1Q12, the Group entered into the 2011 Partner Asset Facility (PAF2) transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covers approximately USD 12 billion notional amount of expected positive exposure from counterparties of the Group, and is addressed in three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element is retained by the Group and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic collateralized debt obligation (CDO) trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Group's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Group for counterparty risk management. As of the end of 2Q13, the carrying value of the PAF2 awards was CHF 598 million. The amount of the PAF2 awards compensation expense for 2Q13 was a credit of CHF 17 million and is included in the amount reflected in the "Deferred compensation expense" table in Note 22 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Group has purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a CDS, accounted for at fair value, with a third-party entity. The value of the senior layer is calculated using the same model as for the PAF2 awards. As of the end of 2Q13, the CDS had a positive replacement value of CHF 17 million. The Group also has a credit support facility with this entity that allows the Group to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances include: (i) a disruption of the CP market such that the entity cannot issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeds certain thresholds and the Group instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider is downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount may be settled by the assignment of the rights and obligations of the CDS to the Group. The credit support facility is accounted for on an accrual basis and is reflected in credit guarantees and similar instruments in the "Guarantees" table. As of the end of 2Q13, the carrying value of the credit support facility included in this table was zero (in million Swiss francs). The transaction overall is a four-year transaction, but can be extended to nine years. The Group has the right to terminate the third-party transaction for certain reasons, including certain regulatory developments.

In December 2012, the BCBS published updated regulatory guidance that makes the PAF2 transaction as currently structured ineligible for counterparty credit spread hedging under the Basel III framework. As a result of this new guidance, the Group has the right to exercise the regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. The Group is in the process of negotiating a restructuring of the transaction in order for the PAF2 transaction as a whole to remain an eligible counterparty credit spread hedge under Basel III. If a restructuring is not completed, the Group may terminate the transaction.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and

non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

▶ Refer to “Note 29 – Litigation” for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Additional information on representations and warranties on residential mortgage loans sold will be included in the Financial Report 2Q13, which will be published on the Group’s website and filed with the SEC on or about July 31, 2013.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the “Guarantees” table.

▶ Refer to “Disposal-related contingencies and other indemnifications” in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these guarantees.

Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, loan commitments, forward reverse repurchase agreements and other commitments.

▶ Refer to “Other commitments” in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these commitments.

Other commitments

end of	2Q13					4Q12

¹ Total net amount is computed as the gross amount less any participations.

² Includes CHF 140,510 million and CHF 139,709 million of unused credit limits as of the end of 2Q13 and 4Q12, respectively, which were revocable at the Group’s sole discretion upon notice to the client.

Note 26 **Transfers of financial assets and variable interest entities**

The required disclosures for transfers of financial assets and variable interest entities will be included in the Financial Report 2013, which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

Transfers of financial assets

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, CP and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue CMBS, RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

- ▶ Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of continuing involvement in transferred financial assets.

Variable interest entities

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation.

- ▶ Refer to “Variable interest entities” in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client

seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 21 days and 27 days as of 2Q13 and 4Q12, respectively. As of 2Q13 and 4Q12, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including auto and equipment loans or leases, student loans, residential mortgages and advance financing receivables. As of 2Q13 and 4Q12, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 1.5 years and 2.9 years as of 2Q13 and 4Q12, respectively.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

Note 27 Financial instruments

Concentrations of credit risk

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that

would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

- ▶ Refer to “Note 33 – Financial instruments” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on the Group's concentrations of credit risk.

Fair value measurement

The required disclosures for the fair value of financial instruments will be included in the Financial Report 2Q13, which will be published on the Group's website and filed with the SEC on or about July 31, 2013.

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit

standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

Note 28 Assets pledged and collateral

The required disclosures for assets pledged and collateral will be included in the Financial Report 2Q13, which will be published on our website and filed with the SEC on or about July 31, 2013.

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of

the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Note 29 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 37 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012* and updated in subsequent quarterly reports (including below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues litigation provisions (including estimated fees and expenses of external lawyers and other service providers) and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss,

additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings, the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 37 referenced above and updated in quarterly reports and below for which the Group believes an estimate is possible is zero to CHF 2.3 billion.

In 2Q13, the Group recorded net litigation provisions of CHF 155 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Mortgage-related matters

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

Individual investor actions

On April 24, 2013, the Supreme Court of the State of New York, New York County (SCNY) dismissed the action brought by Phoenix Light SF Ltd. and affiliated entities against Credit Suisse Securities (USA) LLC (CSS LLC) and its affiliates, although plaintiffs were granted leave to replead. On May 28, 2013, The Union Central Life Insurance Company and affiliated entities filed a letter motion to propose a second amended complaint in the action brought against CSS LLC and its affiliates and employees. On May 13, 2013, following a settlement, a West Virginia state court dismissed with prejudice the action brought by West Virginia Investment Management Board against CSS LLC. On June 20, 2013, the US District Court for the Central District of California dismissed in part the action pending in such court against CSS LLC brought by the FDIC, as receiver for Colonial Bank; the remaining claims relate to approximately USD 34 million of the RMBS at issue (approximately 12% of the USD 283 million at issue against all defendants in the operative pleading).

Repurchase litigations

On May 31, 2013, Asset Backed Securities Corporation Home Equity Loan Trust Series AMQ 2007-HE2 filed an action against DLJ Mortgage Capital, Inc. (DLJ) in the SCNY, alleging that DLJ breached representations and warranties in respect of certain mortgage loans and failed to repurchase such mortgage loans as required under the applicable agreements. No damages amount is alleged.

Auction Rate Securities

On May 22, 2013, the Group and Elbit Systems Ltd (Elbit) settled Elbit's lawsuit in the US District Court for the Southern District of New York seeking approximately USD 16 million related to the purchase of auction rate securities, alleging federal securities law claims and state law aiding and abetting fraud and unjust enrichment causes of action.

Tax matters

Credit Suisse has been responding to subpoenas and other requests for information from the United States Department of

Justice (DOJ), SEC and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities are investigating possible violations of US tax and securities laws. In particular, the DOJ is investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC is investigating whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and one former employee pleaded guilty to conduct while employed at other financial institutions that did not involve Credit Suisse. Credit Suisse received a grand jury target letter from the DOJ. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions. We have been conducting an internal investigation and are continuing to cooperate with the authorities both in the US and Switzerland to resolve this matter in a responsible manner that complies with our legal obligations. Our provision of Swiss-based information to these US authorities has been in accordance with permission granted by Swiss authorities including the Swiss Federal Council. In early July 2013 the Federal Council announced that it would also provide permission to banks, including Credit Suisse, to transmit information on the destination of assets of US clients who closed their Swiss bank account. Credit Suisse has applied for and received such permission from the Federal Council.

Singapore MAS matter

On June 14, 2013, the Monetary Authority of Singapore (MAS) announced it was taking supervisory action against 20 banks for various deficiencies relating to the benchmark processes regarding the Singapore dollar interest rate benchmarks, Singapore Interbank Offered Rates and Swap Offered Rates, and the foreign exchange spot benchmarks commonly used to settle Non-Deliverable Forward foreign exchange contracts. Credit Suisse AG Singapore Branch (CSSB) was one of the named banks. The MAS censured the banks and directed them to adopt measures to address these deficiencies. The MAS has also required 19 of the 20 banks, including CSSB, to set aside additional statutory reserves for a period of one year. CSSB, along with six other panel banks, has been calibrated in the third of five tiers by the MAS and required to set aside additional statutory reserves of SGD 400-600 million, which were deposited with the MAS in a non-interest bearing account. These additional reserves will be returned to each bank within one year, assuming it has satisfied the MAS that it has adopted sufficient measures to address the identified deficiencies.

CDS-related matters

In July 2013, the Directorate General for Competition of the European Commission (DG Comp) issued a Statement of Objections (SO) to various entities of thirteen CDS dealer banks, certain Markit entities and the International Swaps and Derivatives Association, Inc. (ISDA) in relation to DG Comp's investigation into possible violations of competition law by certain CDS market participants. Certain Credit Suisse entities were among the named bank entities. The SO marks the commencement of enforcement

proceedings in respect of what DG Comp alleges were unlawful attempts to prevent the development of exchange traded platforms for CDS between 2006 and 2009. The next step in the process is for the named entities to provide written responses.

In addition, certain Credit Suisse entities, as well as other banks, have been named in civil litigation in the US. Further, Credit Suisse (USA), Inc. has received civil investigative demands from the DOJ.

Note 30 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2013 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;

- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2012.

Our 2012 annual publication suite consisting of Annual Report and Corporate Responsibility Report, which also contains the Company Profile 2012, is available on our website www.credit-suisse.com/investors
