

PROHIBITION OF SALES TO EEA AND UK RETAIL INVESTORS: The Securities are not intended to be offered, sold or otherwise made available to and may not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**") or in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU on Markets in Financial Instruments (as may be amended) ("**MiFID II**"); (ii) a customer within the meaning of Directive 2016/97/EU (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). Consequently no key information document required by Regulation (EU) No 1286/2014 (the "**PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the EEA or in the United Kingdom has been prepared and therefore offering or selling such Securities or otherwise making them available to any retail investors in the EEA or in the United Kingdom may be unlawful under the PRIIPs Regulation.

Following the Brexit implementation period completion day, references in the Base Prospectus (as completed by these Final Terms) to EU legislation will be deemed, for UK purposes, to include references to the corresponding provisions of UK onshored or retained legislation that form part of UK law by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**").

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

1. Liquidity risk arising from potential inability to borrow or access the capital markets on suitably favourable terms (including due to adverse changes in its credit ratings) or to sell its assets. This may also arise from increased liquidity costs. CS relies significantly on its deposit base for funding, which may not continue to be a stable source of funding over time.
2. Risks arising from the impact of market fluctuations and volatility on CS's investment activities (against which its hedging strategies may not prove effective). The spread of COVID-19 and resulting tight government controls and containment measures implemented around the world have caused severe disruption to global supply chains and economic activity, and the market has entered a period of significantly increased volatility. The spread of COVID-19 is continuing to have an adverse impact on the global economy, the severity and duration of which is difficult to predict, and has adversely affected CS's business, operations and financial performance. In addition, there can be no assurance that, even after adjustments are made to model outputs, the Group will not recognize unexpected losses arising from the uncertainty relating to its modelling for current expected credit losses that has resulted from the COVID-19 pandemic. The COVID-19 pandemic has significantly impacted, and is likely to continue to adversely affect CS's credit loss estimates, mark-to-market losses, trading revenues, net interest income and potential goodwill assessments, and may also adversely affect its ability to successfully realize its strategic objectives. To the extent the COVID-19 pandemic continues to adversely affect the global economy, and/or CS's business, operations or financial performance, it may also have the effect of increasing the likelihood and/or magnitude of other risks described herein, or may give rise to other risks not presently known to CS or not currently expected to be significant to its business, operations or financial performance. CS is closely monitoring the potential adverse effects and impact on its operations, businesses and financial performance, including liquidity and capital usage, though the extent of the impact is difficult to fully predict at this time due to the continuing evolution of this uncertain situation. CS is also exposed to other unfavourable economic, monetary, political, legal, regulatory and other developments in the countries in which it operates (as well as countries in which CS does not currently conduct business), including uncertainties regarding the expected discontinuation of benchmark rates. CS's significant positions in the real estate sector – and other large and concentrated positions – may also expose it to larger losses. Many of these market risk factors, including the impact of COVID-19, may increase other risks, including CS's credit risk exposures, which exist across a large variety of transactions and counterparties and in respect of which it may have inaccurate or incomplete information. These are exacerbated by adverse economic conditions and market volatility, including as a result of any defaults by large financial institutions (or any concerns relating thereto).
3. CS's ability to implement its current strategy, which is based on a number of key assumptions, is subject to various factors outside its control, including market and economic conditions and changes in law. The implementation of CS's strategy may increase its exposure to certain risks, including credit risks, market risks, operational risks and regulatory risks. The implementation of CS's strategy relating to acquisitions and other similar transactions subjects it to the risk that it may assume unanticipated liabilities (including legal and compliance issues), as well as difficulties relating to the integration of acquired businesses into its existing operations.
4. Country, regional and political risk in the regions in which CS has clients or counterparties, which may affect their ability to perform their obligations to CS. In part because an element of its strategy is to increase CS's private banking businesses in emerging market countries, it may face increased exposure to economic, financial and political disruptions in those countries, which could result in significant losses. Related fluctuations in exchange rates for currencies (particularly for the US dollar) may also adversely affect CS.
5. A wide variety of operational risks arising from inadequate or failed internal processes, people or systems or from external events, including breaches of cyber-security and other failures of information technology. CS relies heavily on financial, accounting and other data processing systems, which are varied and complex, and may face additional technology risks due to the global nature of its operations. CS is thereby exposed to risks arising from human error, negligence, employee misconduct, fraud, malice, accidental technology failure, cyber-attack and information or security breaches. This also exposes CS to risk from non-compliance with existing policies or regulations. Protecting against threats to CS's cyber-security and data protection systems requires significant financial and human resources. The ongoing global COVID-19 pandemic has increased the vulnerability of CS's information technology systems and the likelihood of damage as a result of a cybersecurity incident because of the wide-scale and prolonged shift to remote working for CS's employees and the increased reliance by CS's customers on remote (digital) banking services. CS's existing risk management procedures and policies may not always be effective against such risks, particularly in highly volatile markets, and may not fully mitigate its risk exposure in all markets or against all types of risk. Moreover, CS's actual results may differ materially from its estimates and valuations, which are based upon judgment and available information and rely on predictive models and processes. The same is true of CS's accounting treatment of off-balance sheet entities, including special purpose entities, which requires it to exercise significant management judgment in applying accounting standards; these standards (and their interpretation) have changed and may continue to change. In addition, physical and transition climate risks could have a financial impact on CS either directly, through its physical assets, costs and operations, or indirectly, through its financial relationships with its clients.
6. CS's exposure to legal risks is significant and difficult to predict and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms continues to increase in many of the principal markets in which CS operates. Changes in regulation (including in relation to sanctions) and monetary policy applicable to CS (as well as regulations and changes in enforcement practices applicable to its clients) may adversely affect its business and ability to execute its strategic plans and increase costs, as well as impact the demand from clients for CS's services. Moreover, CS's ability to attract and retain customers, clients, investors and employees, and conduct business transactions with its counterparties, could be adversely affected to the extent its

reputation is damaged, which could arise from various sources, including if its procedures and controls fail (or appear to fail). In addition, Swiss resolution proceedings may affect CS's shareholders and creditors.

7. CS faces intense competition in all financial services markets, which has increased as a result of consolidation, as well as emerging technology and new trading technologies (including trends towards direct access to automated and electronic markets and the move to more automated trading platforms). In such a highly competitive environment, CS's performance is affected by its ability to recruit and retain highly skilled employees.

What are the key risks that are specific to the Securities?

1. **Risks in case of an insolvency or resolution measures in respect of the Issuer.** An investment in the Securities constitutes unsecured obligations of the Issuer and will not be covered by any statutory or other deposit protection scheme and does not have the benefit of any guarantee. Therefore in the event of the insolvency of the Issuer, an investor in the Securities may lose all or some of its investment therein irrespective of any favourable development of the other value determining factors, such as the performance of the underlying asset(s). Similarly, prior to an insolvency of the Issuer, rights of the holders of the Securities may be adversely affected by the Swiss Financial Market Supervisory Authority FINMA's broad statutory powers in the case of a restructuring proceeding in relation to Credit Suisse, including its power to convert the Securities into equity and/or partially or fully write-down the Securities.
2. **Potential loss of some or all of the investment.** The Securities are "capital at risk" investments and investors may lose some or all of their money depending on the performance of the relevant underlying asset. Securityholders will be exposed to the performance of the underlying asset which has the worst performance of a basket of underlying assets, irrespective of how the other underlying assets perform. Therefore, if such underlying asset fails to meet the specified threshold or barrier or if the amount payable on redemption of the Securities is less than the purchase price paid by investors for the Securities, investors may lose some or all of their investment. In addition, if the Securities are sold in the secondary market for less than the purchase price paid by the relevant investor, investors may lose some or all of their investment.
3. **Risks in connection with redemption of the Securities at the unscheduled termination amount.** The Securities may be redeemed at the unscheduled termination amount in certain circumstances, including: following the occurrence of an event of default or for illegality reasons or following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s). In such circumstances, the unscheduled termination amount is likely to be less than the original purchase price and could be as low as zero and, following any such early redemption, investors may be unable to reinvest the proceeds in an investment having a comparable return. Following the occurrence of any such event, no other amounts on account of interest or otherwise shall be payable by the Issuer in respect of the Securities.
4. **In certain circumstances, the Issuer may adjust the terms of the Securities and such adjustment may have a negative effect on the value of the Securities.** Subject to the terms and conditions of the Securities, if the Issuer determines that any adjustment events, additional disruption events or other events affecting the underlying asset(s) or the Issuer's hedging arrangements or the cost to the Issuer of performing its obligations under the Securities have occurred or if certain events affecting the Issuer's ability to value the underlying asset(s) or make payments have occurred, the Issuer may adjust the terms and conditions of the Securities without the consent of the Securityholders, or may postpone or apply alternative provisions for valuations. Any such adjustment, postponement or alternative valuation could have a material adverse effect on the return on, and value of, the Securities.
5. **Early redemption following a Trigger Event.** As the Securities have a trigger feature, the timing of redemption of the Securities is uncertain as the occurrence of a Trigger Event will be dependent on the performance of the underlying

asset(s). In the case of an unfavourable development of the value of the underlying asset(s), any redemption may only occur on the scheduled maturity date and the amount payable on redemption of the Securities will be determined based on the unfavourable performance of the underlying asset(s). In such circumstances, the return on the Securities may be less than the amount originally invested and less than an investor would have received had a Trigger Event occurred.

6. **Securities with barrier features.** As the terms of the Securities have a barrier feature, amounts payable under the Securities will depend on the value or performance of the underlying asset(s) satisfying the relevant condition. If such condition is not satisfied, no Coupon Amount may be due and/or payments in respect of the Securities may be determined by reference to the performance of the underlying asset(s) which may affect the value of and return on the Securities.
7. **Risks associated with shares.** The performance of a share is dependent upon macroeconomic factors which may adversely affect such performance and, in turn, the value of the Securities. The issuer of a share has no obligation to any Securityholder and may take any actions in respect of such share without regard to the interests of Securityholders which could adversely affect the market value of and return on the Securities. Securityholders will not participate in dividends or other distributions paid on such share.
8. **Risks in connection with the secondary market.** The secondary market for the Securities may be limited, may never develop at all or may not continue even though the Securities are listed, which may adversely impact the market value of such Securities or the ability of the investor thereof to sell such Securities. In addition, the market value of the Securities will be affected by factors beyond the control of the Issuer, such as the creditworthiness of the Issuer, the remaining time to maturity of the Securities, interest and yield rates, the value and volatility of the underlying asset(s), such underlying asset(s), and national and international events.
