INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE

So far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue, save for any fees payable to the distributor(s).

The amount of the commission that the Issuer or its affiliates pay to the Distributor in connection with the distribution of the Notes is up to 1.20% (all tax

included) per annum of the Specified Denomination per Note, over the maximum term of the Notes. Commissions may be payable upfront. These commissions are included in the purchase price.

The Issue Price and the terms of the Securities take into account such fee and may be more than the market value of the Securities on the Issue Date.

EURO iSTOXX® Equal Industry ESG 30 NR Decrement 5% Index

'Decrement' Index

The EURO iSTOXX® Equal Industry ESG 30 NR Decrement 5% Index (the "Index") is a 'decrement' index. This means the Index represents the performance of a strategy tracking a given net total return index from which a pre-determined amount (a 'synthetic dividend') is deducted periodically. The synthetic dividend is expressed as a fixed percentage independent of the Index level. Depending on the level of dividends paid by the relevant companies, a decrement index may perform differently in comparison to other market indices that include dividend adjustments due to the different dividend methodologies adopted.

A "price return" index is calculated on the basis that dividends paid on the components are not reinvested. A standard "net total return" index is calculated on the basis that net dividends paid on the components are reinvested, thereby increasing the value of the index compared to the price return version. Due to the fixed percentage of synthetic dividend being subtracted from the Index, the Index will underperform an otherwise equivalent net total return index where net dividends are reinvested. In case the synthetic dividend is larger than the net realised level of dividends paid by the relevant companies, the decrement index will underperform an otherwise equivalent price return index.

The Index is built with a synthetic dividend of 5 per cent.
