What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

1. Liquidity risk arising from potential inability to borrow or access the capital markets on suitably favourable terms (including due to adverse changes in its credit ratings) or to sell its assets. This may also arise from increased liquidity costs. CS relies significantly on its deposit base for funding, which may not continue to be a stable source of funding over time.
2. Risks arising from the impact of market fluctuations and volatility on CS' investment activities (against which its hedging strategies may not prove effective). The spread of COVID-19 has caused disruption to global supply chains and economic activity; this is expected to have a significant impact on the global economy, at least in the first half of 2020, and is likely to affect CS's financial performance, including credit loss estimates, trading revenues, net interest income and potential goodwill assessments. CS is closely monitoring the potential effects and impact on its operations, businesses and financial performance, including liquidity and capital usage, though the extent is difficult to fully predict at this time due to the rapid evolution of this uncertain situation. CS is also exposed to other unfavourable economic, monetary, political, legal, regulatory and other developments in the countries in which it operates (as well as countries in which CS does not currently conduct business), including uncertainties regarding the possible discontinuation of benchmark rates. CS' significant positions in the real estate sector - and other large and concentrated positions - may also expose it to larger losses. Many of these market risk factors, including the impact of COVID-19, may increase other risks, including CS' credit risk exposures, which exist across a large variety of transactions and counterparties and in respect of which it may have inaccurate or incomplete information. These are exacerbated by adverse economic conditions and market volatility, including as a result of any defaults by large financial institutions (or any concerns relating thereto).
3. CS' ability to implement its current strategy, which is based on a number of key assumptions, is subject to various factors outside its control, including market and economic conditions and changes in law. The implementation of CS' strategy may increase its exposure to certain risks, including credit risks, market risks, operational risks and regulatory risks. The implementation of CS' strategy relating to acquisitions and other similar transactions subjects it to the risk that it may assume unanticipated liabilities (including legal and compliance issues), as well as difficulties relating to the integration of acquired businesses into its existing operations.
4. Country, regional and political risk in the regions in which CS has clients or counterparties, which may affect their ability to perform their obligations to CS. In part because an element of its strategy is to increase CS' private banking businesses in emerging market countries, it may face increased exposure to economic instability in those countries, which could result in significant losses. Related fluctuations in exchange rates for currencies (particularly for the US dollar) may also adversely affect CS.
5. A wide variety of operational risks arising from inadequate or failed internal processes, people or systems or from external events, including cybersecurity and other information technology. CS relies heavily on financial, accounting and other data processing systems, which are varied and complex, and may face additional technology risks due to the global nature of its operations. CS is thereby exposed to risks arising from human error, fraud, malice, accidental technology failure, cyber attack and information or security breaches. CS' businesses are also exposed to risk from non-compliance with existing policies or regulations, employee misconduct or negligence and fraud. CS' existing risk management procedures and policies may not always be effective against such risks, particularly in highly volatile markets, and may not fully mitigate its risk exposure in all markets or against all types of risk. Moreover, CS' actual results may differ materially from its estimates and valuations, which are based upon judgment and available information and rely on predictive models and processes. The same is true of CS' accounting treatment of off-balance sheet entities, including special purpose entities, which requires it to exercise significant management judgment in applying accounting standards; these standards (and their interpretation) have changed and may continue to change.
6. CS' exposure to legal risks is significant and difficult to predict and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms continues to increase in many of the principal markets in which CS operates. Changes in regulation and monetary policy applicable to CS (as well as regulations and changes in enforcement practices applicable to its clients) may adversely affect its business and ability to execute its strategic plans and increase costs, as well as impact the demand from clients for CS' services. In addition, Swiss resolution proceedings may affect CS shareholders and creditors.
7. Intense competition in all financial services markets, which has increased as a result of consolidation, as well as emerging technology and new trading technologies (including trends towards direct access to automated and electronic markets and the move to more automated trading platforms). In such a highly competitive environment, CS' performance is affected by its ability to recruit and retain highly skilled employees and maintain its reputation for financial strength and integrity, which could be harmed if its procedures and controls fail (or appear to fail).

Limitations to rights:

- The Issuer may redeem the Securities early for illegality reasons or following certain events affecting the Issuer's hedging arrangements and/or the Underlying Asset. The Securities may be redeemed early following an event of default. In each such case, the amount payable in respect of each Security on such early redemption will be equal to the Unscheduled Termination Amount, and no other amount shall be payable in respect of each Security on account of interest or otherwise.

Where:

Unscheduled Termination Amount: in respect of each Security, an amount (which may be greater than or equal to zero) equal to the value of such Security immediately prior to it becoming due and payable following an event of default or, in all other cases, as soon as reasonably practicable following the determination by the Issuer to early redeem the Security, as calculated by the calculation agent using its then prevailing internal models and

methodologies.

For the avoidance of doubt, if a Security is redeemed following an event of default, the Unscheduled Termination Amount shall not take account of any additional or immediate impact of the event of default itself on the Issuer's creditworthiness (including, but not limited to, an actual or anticipated downgrade in its credit rating).

- Subject to the conditions and other restrictions set out in the terms and conditions of the Securities, the Issuer may adjust the terms and conditions of the Securities without the consent of Securityholders following certain events affecting the Issuer's hedging arrangements and/or the Underlying Asset, or may early redeem the Securities at the Unscheduled Termination Amount as described above (and no other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer).
- The terms and conditions of the Securities contain provisions for convening meetings of Securityholders to consider any matter affecting their interests, and any resolution passed by the relevant majority at a meeting will be binding on all Securityholders, whether or not they attended such meeting or voted for or against the relevant resolution. In certain circumstances, the Issuer may modify the terms and conditions of the Securities without the consent of Securityholders.
- The Securities are subject to the following events of default: if the Issuer fails to pay an amount due in respect of the Securities within 30 days of the due date, or if any events relating to the insolvency or winding up of the Issuer occur.
- The Issuer may at any time, without the consent of the Securityholders, substitute for itself as Issuer under the Securities any company with which it consolidates, into which it merges or to which it sells or transfers all or substantially all of its property.

Governing law: The Securities are governed by English law.

Status of the Securities

The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

Description of restrictions on free transferability of the Securities

No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations.

Where will the Securities be traded?

Application has been made to admit the Securities to trading on the regulated market of the Luxembourg Stock Exchange.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

1. Investors may lose some or all of their investment if one or more of the following occurs: (a) if the Issuer either fails or is otherwise unable to meet its payment obligations under the Securities, (b) if no Trigger Event has occurred and the Final Price is less than 60 per cent. of the Strike Price, (c) if investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price, (d) if the Securities are redeemed early at the discretion of the Issuer and the Unscheduled Termination Amount is less than the initial purchase price, or (e) if any adjustments are made to the terms and conditions of the Securities that result in the amount payable under the Securities being reduced.
2. The value of and return on the Securities will depend on the price of the Underlying Asset on each Trigger Barrier Observation Date, the Knock-in Observation Date and the Final Fixing Date, as compared to the Strike Price of such Underlying Asset.
3. The Underlying Asset is a stapled share comprising a number of component shares and is traded on the relevant exchange as if it were a single security. Each of the component shares may not be traded or transferred separately. Stapled share structures can be complex and any distributions payable may be made up of several components with different tax, legal or other consequences. There may be limited liquidity in a stapled share in the secondary market. These factors may all affect the value of the Underlying Asset, and in turn, may adversely affect the value of and return on the Securities.
4. The performance of a share (including a stapled share) is dependent upon macroeconomic factors which may adversely affect the value of the Securities. The issuer of a share (including each issuer of a component share) has no obligation to any Securityholders and may take actions in respect of such share without regard to the

interests of Securityholders, and any of these actions could adversely affect the value of and return on the Securities. Securityholders will not participate in dividends or other distributions paid on such share.

5. The Issuer may apply any consequential postponement of, or any alternative provisions for, valuation of the Underlying Asset following certain disruption events in relation to such Underlying Asset, each of which may have an adverse effect on the value of and return on the Securities.
6. In certain circumstances (for example, if the Issuer determines that its obligations under the Securities have become unlawful or illegal, following an event of default or following certain events affecting the Issuer's hedging arrangements and/or the Underlying Asset), the Securities may be redeemed prior to their scheduled maturity. In such circumstances, the Unscheduled Termination Amount payable may be less than the original purchase price and could be as low as zero. No other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer.
7. Subject to the conditions and other restrictions set out in the terms and conditions of the Securities, if the Issuer determines that any adjustment events or other events affecting (i) the Underlying Asset or any of its component shares (including the de-stapling of such component shares), or (ii) the Issuer's hedging arrangements have occurred, the Issuer may adjust the terms and conditions of the Securities without the consent of the Securityholders. Any such adjustment could have a material adverse effect on the return on, and value of, the Securities.

PART TWO
SECURITIES NOTE
RISK FACTORS

The Issuer believes that the risk factors specific to the Securities described below are material for the purpose of taking an informed investment decision associated with the Securities, but these are not the only risks that the Issuer faces or that may arise under the Securities. There will be other risks that the Issuer does not currently consider to be material, or risks that the Issuer is currently not aware of, or risks that arise due to circumstances specific to the investor.

More than one investment risk may have simultaneous effect with regard to the value of the Securities and the effect of any single investment risk may not be predictable. In addition, more than one investment risk may have a compounding effect and no assurance can be given as to the effect that any combination of investment risks may have on the value of Securities.

Within each category, the risk factor that the Issuer believes is the most material to the Securities is presented first. For the avoidance of doubt, the remaining risk factors in each category are not presented in order of materiality.

1. Risks relating to the Securities generally

(a) Potential loss of some or all of the investment

Investors may lose some or all of their investment if one or more of the following occurs:

- (i) if the Issuer either fails or is otherwise unable to meet its payment obligations under the Securities;
- (ii) if no Trigger Event has occurred and the Final Price is less than 60 per cent. of the Strike Price;
- (iii) if investors sell their Securities prior to maturity in the secondary market at an amount that is less than the issue price or the initial purchase price of the Securities;
- (iv) if the Securities are redeemed early under their terms and conditions at the discretion of the Issuer and the Unscheduled Termination Amount payable on such early redemption is less than the issue price or the initial purchase price; and/or
- (v) if any adjustments are made to the terms and conditions of the Securities following certain events affecting the Issuer's hedging arrangements and/or the Underlying Asset, that result in the amount payable under the Securities being reduced to, or being valued at, an amount that is less than the original investment.

(b) The Securities are general unsecured obligations of the Issuer

Securityholders are exposed to the credit risk of the Issuer. The Securities will be adversely affected in the event of (i) a default, (ii) a reduced credit rating of the Issuer, (iii) increased credit spreads charged by the market for taking credit risk on the Issuer, or (iv) a deterioration in the solvency of the Issuer. The Securities are not deposits and are not protected under any deposit insurance or protection scheme.

(c) In certain circumstances, the Issuer may redeem the Securities prior to their scheduled maturity. The Unscheduled Termination Amount payable on such early redemption may be less than the issue price or the purchase price

The Securities may be redeemed prior to their scheduled maturity in certain circumstances – for example, (i) if the Issuer determines that its obligations under the Securities (including any

calculations or determinations to be made by the Issuer), or its hedging arrangements have become unlawful or illegal, (ii) following an event of default, (iii) following certain events having occurred in relation to the Underlying Asset. In such case, the Securities may be redeemed early prior to their scheduled maturity for an amount equal to the Unscheduled Termination Amount and no other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer.

The Unscheduled Termination Amount will be equal to the value of the Securities immediately prior to them becoming due and payable following an event of default or, in all other cases, as soon as reasonably practicable following the determination by the Issuer to early redeem the Securities, as calculated by the Calculation Agent using its then prevailing internal models and methodologies. In particular, investors should note that the Calculation Agent will take into account the creditworthiness of the Issuer (including, but not limited to, an actual or anticipated downgrade in its credit rating) and the interest rate at which the Issuer (or its affiliates) is charged to borrow cash (which may also reflect the creditworthiness of the Issuer) in calculating the value of the Securities, which may reduce the Unscheduled Termination Amount payable.

The Unscheduled Termination Amount may be less than the issue price or the initial purchase price of the Securities and investors may therefore lose some or all of their investment and may not be able to reinvest the proceeds in another investment offering a comparable return.

(d) The market value of the Securities will be affected by factors beyond the control of the Issuer

The market value of the Securities will be affected by factors beyond the control of the Issuer, such as the factors listed below:

- (i) the creditworthiness of the Issuer (whether actual or perceived), including actual or anticipated downgrades in its credit rating;
- (ii) the remaining time to maturity of the Securities;
- (iii) interest rates and yield rates in the relevant market(s);
- (iv) the volatility (i.e., the frequency and size of changes in the value) of the Underlying Asset;
- (v) the value of the Underlying Asset to which the Securities are linked;
- (vi) national and international economic, financial, regulatory, political, military, judicial and other events that affect the value of the Underlying Asset or the relevant market(s) generally; and
- (vii) the exchange rate between the currency in which the Securities are denominated and the currency in which the Underlying Asset is denominated and the volatility of such exchange rate.

Some or all of the above factors will influence the value of and return on the Securities in the market. Some of these factors are inter-related in a complex way, and as a result, the effect of any one factor may be offset or magnified by the effect of another factor.

Further, the price at which you sell your Securities in the market will reflect a commission or a dealer discount, which would further reduce the proceeds you would receive for your Securities. If you sell your Securities prior to maturity, the price you will receive may be substantially lower than the original purchase price and you may lose some or all of your investment. This could be the case even if the value of each Underlying Asset has not changed since the Issue Date.

(e) Limited liquidity

Notwithstanding that application will be made for the Securities to be admitted to trading on an exchange, the Securities may not have an active trading market. The Issuer may, but is not obliged to, purchase the Securities at any time at any price in the open market or by tender or private treaty and may hold, resell or cancel them. As such, the only way in which a

Securityholder can realise value from a Security prior to its maturity or expiry is to sell it at its then market price in the market, which may be less than the amount initially invested (see the risk factor entitled "*The market value of the Securities will be affected by factors beyond the control of the Issuer*").

A secondary market for the Securities may not develop. Even if one does develop, it may not provide the holders of the Securities with significant liquidity and/or may not continue for the life of the Securities. A decrease in the liquidity of the Securities may cause, in turn, an increase in the volatility associated with the price of such Securities. Illiquidity may have a severe adverse effect on the market value of the Securities.

The Securities are also subject to selling restrictions and/or transfer restrictions that may limit a Securityholder's ability to resell or transfer its Securities.

Accordingly, the purchase of Securities is suitable only for investors who can bear the risks associated with a lack of liquidity in the Securities and the financial and other risks associated with an investment in the Securities. Any investor in the Securities must be prepared to hold such Securities for an indefinite period of time or until redemption or expiry of the Securities.

(f) The Issue Price may be more than the market value of the Securities as at the Issue Date

The Issue Price in respect of any Securities may be more than the market value of such Securities as at the Issue Date, and more than the price, if any, at which the Dealer or any other person is willing to purchase such Securities in secondary market transactions. In particular, the Issue Price in respect of any Securities and the terms of such Securities take into account, where permitted by law, fees, commissions or other amounts relating to the issue, distribution and sale of such Securities, or the provision of introductory services. Such fees, commissions or other amounts may be paid directly to the relevant distributor or, if the Securities are sold to the relevant distributor at a discount, may be retained by the relevant distributor out of the Issue Price paid by investors. In addition, the Issue Price in respect of the Securities and the terms of such Securities may also take into account (i) the expenses incurred by the Issuer in creating, documenting and marketing the Securities (including its internal funding costs), and (ii) amounts relating to the hedging of the Issuer's obligations under such Securities.

(g) In certain circumstances, the Issuer may adjust the terms of the Securities, and such adjustment may have a negative effect on the value of the Securities

If the Issuer determines that any adjustment events or other events affecting (i) the Underlying Asset or any of its Component Shares (including the de-stapling of such Component Shares), or (ii) the Issuer's hedging arrangements have occurred, the Issuer may adjust the terms and conditions of the Securities without the consent of the Securityholders. Any such adjustment could have a material adverse effect on the return on, and value of, the Securities.

(h) The Issuer may be substituted without the consent of Securityholders

The Issuer of Securities may be substituted without the consent of Securityholders in favour of any affiliate of the Issuer or another company with which it consolidates, into which it merges or to which it sells or transfers all or substantially all of its property, subject to certain conditions being fulfilled.

(i) Risk of withdrawal of offering and/or cancellation of issue of Securities

It is a condition of the offer that the Issuer reserves the right to withdraw the offer and/or cancel the issue of Securities at any time. The Issuer may determine to withdraw the offer and/or cancel the issue of Securities for reasons beyond its control, such as extraordinary events, substantial change of the political, financial, economic, legal, monetary or market conditions at national or international level and/or adverse events regarding the financial or commercial position of the Issuer and/or the other relevant events that in the determination of the Issuer may be prejudicial to the offer and/or issue of the Securities. In such circumstances, the offer will be deemed to be null and void. In such case, where an investor has already paid or delivered subscription monies for the relevant Securities, the investor will be entitled to reimbursement of such amounts, but will not receive any interest that may have accrued in the period between their

payment or delivery of subscription monies and the reimbursement of the amount paid for such Securities.

(j) No obligation to maintain listing

Investors should note that the Issuer will not be obliged to maintain the listing of the Securities. Securities may be suspended from trading and/or de-listed at any time in accordance with applicable rules and regulations of the relevant stock exchange(s). If the regulated market or other market in respect of which the Securities are listed and/or admitted to trading closes, or if the relevant regulated market in respect of which the Securities are admitted to trading is replaced with a market that is not a regulated market, the Issuer may de-list the Securities or may (but is not obliged to) consent to the Securities to be admitted to trading on such replacement market instead. In the event that there is a delay or break between the listing of the Securities on the original market or regulated market, as the case may be, and the listing of the Securities on the replacement market, or the Securities are de-listed, there may be a negative impact on the Securities (for example this may negatively impact the liquidity of the Securities and the ability of the Securityholders to sell the Securities).

(k) The rights of the holders of Securities issued by the Issuer may be adversely affected by Swiss Financial Market Supervisory Authority FINMA's broad statutory powers in the case of a restructuring proceeding in relation to the Issuer, including its power to convert such Securities into equity and/or partially or fully write-down such Securities

Swiss banking laws provide FINMA with broad powers and discretion in the case of resolution procedures with respect to Swiss banks such as the Issuer. In such resolution procedures, FINMA may require the conversion of Securities issued by the Issuer into equity of the Issuer and/or a partial or full write-down of such Securities. In such case, holders of Securities issued by the Issuer would lose all or some of their investment in such Securities. Where FINMA orders the conversion of Securities issued by the Issuer into equity of the Issuer, the securities received may be worth significantly less than such Securities and may have a significantly different risk profile.

2. Risks associated with Securities that are linked to the Underlying Asset

(a) The value of and return on the Securities depend on the performance of the Underlying Asset

The Securities represent an investment linked to the performance of the Underlying Asset and Securityholders should note that the value of and return on the Securities will depend on the performance of the Underlying Asset on each Trigger Barrier Observation Date, the Knock-in Observation Date and the Final Fixing Date, as compared to the Strike Price of such Underlying Asset.

(b) Occurrence of Additional Disruption Events

Additional Disruption Events in respect of the Underlying Asset may include events which result in the Issuer incurring material costs for performing its obligations under the Securities due to a change in applicable law or regulation, or the inability of the Issuer and/or its affiliates to maintain or enter into hedging arrangements in respect of such Underlying Asset and the Securities. Upon determining that an Additional Disruption Event has occurred, the Issuer has discretion to make certain determinations to account for such event including to (i) make adjustments to the terms of the Securities (without the consent of the Securityholders), or (ii) cause an early redemption of the Securities. Any such determination may have an adverse effect on the value of and return on the Securities. Following such determination by the Issuer, no other amounts shall be payable in respect of the Securities on account of interest or otherwise.

(c) Past performance of the Underlying Asset is not a reliable indicator of future performance

Any information about the past performance of the Underlying Asset at the time of the issuance of the Securities may not be a reliable indicator of the range of, or trends in, fluctuations in such

Underlying Asset that may occur in the future. The level of the Underlying Asset (and of components included in such Underlying Asset) may go down as well as up throughout the term of the Securities. Such fluctuations may affect the value of and return on the Securities. There can be no assurance as to the future performance or movement of the Underlying Asset.

Any such consequence could have a material adverse effect on the value of and return on any such Securities.

(d) **Non-Scheduled Trading Days or Market Disruption Events may adversely affect the value of and return on the Securities**

If a scheduled date on which the price of the Underlying Asset is observed or determined falls on a day which is not a Scheduled Trading Day for such Underlying Asset, then the relevant date may be postponed.

Further, if the Issuer determines that a Market Disruption Event in relation to the Underlying Asset has occurred which affects the observation or determination of the price of such Underlying Asset on any relevant day, then the relevant date may be postponed or the Issuer may determine the price of such Underlying Asset using one or more alternative provisions, or may ultimately determine the price of such Underlying Asset in its discretion.

Any such postponement and/or alternative determination of the price of the Underlying Asset may adversely affect the value of and return on the Securities. In the event that one or more scheduled dates on which the price of the Underlying Asset is observed or determined are postponed, the scheduled Maturity Date or other relevant payment date may also be postponed.

(e) **Risks associated with the Underlying Asset**

(i) ***The Underlying Asset is a stapled share***

The Underlying Asset is a stapled share comprising a number of Component Shares and is traded on the relevant Exchange as if it were a single security. Each of the Component Shares may not be traded or transferred separately. Stapled share structures can be complex and any distributions payable may be made up of several components with different tax, legal or other consequences. There may be limited liquidity in a stapled share in the secondary market. These factors may all affect the value of the Underlying Asset, and in turn, may adversely affect the value of and return on the Securities.

(ii) ***Factors affecting the performance of a Share (including a stapled share)***

The performance of a Share is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy.

(iii) ***Actions by the issuer of a Share or Component Share may adversely affect the Securities***

The issuer of a Share or a Component Share will have no involvement in the offer and sale of the Securities and will have no obligation to any Securityholders. The issuer of a Share or a Component Share may take any actions in respect of such Share or Component Share (as the case may be) without regard to the interests of the Securityholders, and any of these actions could adversely affect the market value of and return on the Securities.

(iii) ***Determinations made by the Issuer in respect of Potential Adjustment Events and Extraordinary Events may have an adverse effect on the value of the Securities***

The adjustment events referred to in risk factor 1(c) (*In certain circumstances, the Issuer may redeem the Securities prior to their scheduled maturity. The Unscheduled Termination Amount payable on such early redemption may be less than the issue price or the purchase price*) include, in respect of Shares or Component Shares, Potential

Adjustment Events and Extraordinary Events. Potential Adjustment Events include (A) a sub-division, consolidation or re-classification of Shares or Component Shares (as the case may be), (B) an extraordinary dividend, (C) a call of Shares or Component Shares (as the case may be) that are not fully paid-up, (D) a repurchase by the issuer of the Shares or the Component Shares (as the case may be), or an affiliate thereof, of the Shares or the Component Shares (as the case may be), (E) a separation of rights from Shares or Component Shares (as the case may be), (F) any event having a dilutive or concentrative effect on the value of Shares or Component Shares (as the case may be), or (G) the amendment or supplement to the terms of the deposit agreement in respect of Shares which are Depositary Receipts or to the Stapled Share Principles in respect of Shares which are stapled shares. Extraordinary Events include (1) a delisting of Shares on an exchange, (2) an insolvency or bankruptcy of the issuer of the Shares or the Component Shares (as the case may be), (3) a merger event entailing the consolidation of Shares or Component Shares (as the case may be) with those of another entity, (4) a nationalisation of the issuer of the Shares or the Component Shares (as the case may be) or transfer of Shares or Component Shares (as the case may be) to a governmental entity, (5) a tender offer or takeover offer that results in transfer of Shares or Component Shares (as the case may be) to another entity or (6) where the Share is a stapled share, a de-stapling or separation of the relevant Component Shares, where the Component Shares are, or are deemed to be, no longer trading as a single stapled security on the relevant exchange

Upon determining that a Potential Adjustment Event or an Extraordinary Event has occurred in relation to a Share or Share issuer, or a Component Share or Component Share issuer (as the case may be), the Issuer has discretion to make certain determinations to account for such event including to (aa) make adjustments to the terms of the Securities (without the consent of Securityholders), and/or (bb) (in the case of an Extraordinary Event) (x) if the relevant Issue Terms specify that "Institutional" is applicable or if the terms of the Securities do not provide for the amount payable at maturity to be subject to a minimum amount or for Instalment Amounts to be payable, cause an early redemption of the Securities, or (y) otherwise, redeem the Securities at the scheduled maturity by payment of the Unscheduled Termination Amount instead of the Redemption Amount or the Settlement Amount (as the case may be). Any of such determinations may have an adverse effect on the value of and return on the Securities. Following a determination by the Issuer in accordance with (bb)(x) or (bb)(y), no other amounts shall be payable in respect of the Securities on account of interest or otherwise, provided that, in respect of Instalment Securities, notwithstanding the occurrence of such an event, each Instalment Amount scheduled to be paid (but unpaid) on an Instalment Date falling on or after the Unscheduled Termination Event Date shall continue to be paid on such Instalment Date.

In making any such adjustments or determinations, the relevant Issuer in such capacity will (whether or not already expressed to be the case in the Conditions) act in good faith and in a commercially reasonable manner, and (where there is a corresponding applicable regulatory obligation) shall take into account whether fair treatment is achieved by any such adjustments or determinations in accordance with its applicable regulatory obligations.

(iv) ***Loss of return of dividends in respect of most Securities linked to Shares***

Unless the terms and conditions of the Securities specify otherwise, holders of such Securities in respect of which an Underlying Asset is a Share will not participate in dividends or other distributions paid on such Share or any Component Shares in respect thereof. Therefore, the return on such Securities will not reflect the return a Securityholder would have realised had it actually owned such Shares or Component Shares and received the dividends in respect of them.

(f) **Correction of published prices**

In the event that the relevant published prices of the Underlying Asset are subsequently corrected and such correction is published by the entity or sponsor responsible for publishing

such prices, subject to such correction and publication occurring prior to a specified cut-off date in respect of the Securities, such corrected prices may be taken into account by the Issuer in any determination in relation to the Securities and/or the Issuer may make adjustments to the terms of the Securities, subject to the provisions of the relevant terms and conditions for the Securities. Where such corrected prices are lower than the original prices, this may have an adverse effect on the value of and return on the Securities.

3. Risks associated with conflicts of interest between the Issuer and the Securityholders

(a) Calculations and determinations under the Securities

In making calculations and determinations with regard to the Securities, there may be a difference of interest between the Securityholders and the Issuer. Save where otherwise provided in the terms and conditions, the Issuer is required to act in good faith and in a commercially reasonable manner but the Issuer does not have any obligations of agency or trust for any investors and has no fiduciary obligations towards them. In particular, the Issuer and its affiliated entities may have interests in other capacities (such as other business relationships and activities). Prospective investors should be aware that any determination made by the Issuer may have a negative impact on the value of and return on the Securities.

Each of the Issuer, the Dealer or any of their respective affiliates may have existing or future business relationships with each other (including, but not limited to, lending, depository, derivative counterparty, risk management, advisory and banking relationships), and when acting in such other capacities the Issuer, the Dealer or any of their respective affiliates may pursue actions and take steps that it deems necessary or appropriate to protect its interests arising therefrom without regard to the consequences for any particular Securityholder.

(b) Hedging and dealing activities in relation to the Securities and Underlying Asset

In the ordinary course of its business the Issuer and/or any of its affiliates may effect transactions for its own account or for the account of its customers and may enter into one or more hedging transactions with respect to the Securities or related derivatives. In connection with such hedging or market-making activities or with respect to proprietary or other trading activities by the Issuer and/or any of its affiliates, the Issuer and/or any of its affiliates may enter into transactions in or in respect of the Underlying Asset or related derivatives which may affect the market price, liquidity, value of or return on the Securities and which could be adverse to the interest of the relevant Securityholders.

For example, the Issuer (itself or through an affiliate) may hedge the Issuer's obligations under the Securities by purchasing futures and/or other instruments linked to the Underlying Asset or other Components underlying the Underlying Asset. The Issuer (or affiliate) may adjust its hedge by, among other things, purchasing or selling any of the foregoing, and perhaps other instruments linked to the Underlying Asset or (if applicable) the Components, at any time and from time to time, and may unwind the hedge by selling any of the foregoing on or before the maturity date for the Securities. The Issuer (or affiliate) may also enter into, adjust and unwind hedging transactions relating to other securities whose returns are linked to changes in the level, price, rate or other applicable value of the Underlying Asset or (if applicable) the Components. Any of these hedging activities may adversely affect the level, price, rate or other applicable value of the Underlying Asset - directly or (if applicable) indirectly by affecting the level, price, rate or other applicable value of underlying Components - and therefore the value of and return on the Securities. It is possible that the Issuer (or affiliate) could receive substantial returns with respect to such hedging activities while the value of and return on the Securities may decline.

Moreover, the Issuer (or affiliate) may also engage in trading in one or more of the Underlying Asset or (if applicable) the Components or the instruments whose returns are linked to the Underlying Asset or (if applicable) the Components, for its proprietary accounts, for other accounts under its management or to facilitate transactions, including block transactions, on behalf of customers. Any of these activities of the Issuer (or affiliate) could adversely affect the level, price, rate or other applicable value of the Underlying Asset - directly or (if applicable) indirectly by affecting the level, price, rate or other applicable value of underlying Components

- and therefore, the value of and return on the Securities. The Issuer (or affiliate) may issue or underwrite, other securities or financial or derivative instruments with returns linked to changes in the level, price, rate or other applicable value of an Underlying Asset or (if applicable) one or more of the Components, as applicable. By introducing competing products into the marketplace in this manner, the Issuer (or affiliate) could adversely affect the value of and return on the Securities.

(c) **Confidential information relating to the Underlying Asset**

The Issuer and its affiliates (and any of their employees) may from time to time, by virtue of their status as underwriter, advisor or otherwise, possess or have access to information relating to the Underlying Asset and any derivative instruments referencing them. None of the Issuers or its affiliates will be obliged (and may be subject to legal prohibition) to disclose any such information to an investor in the Securities.

"(a) If the Issuer determines that a Potential Adjustment Event has occurred in respect of a Share or a Component Share, the Issuer will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the

relevant Shares or Component Shares (as the case may be) and, if so, the Issuer will (i) make the corresponding adjustment(s), if any, to one or more of any variable relevant to the exercise, settlement, payment or other terms of the Securities as the Issuer determines appropriate to account for that diluting or concentrative effect and to preserve the original economic objective and rationale of the Securities (provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Share or Component Share (as the case may be)), and (ii) determine the effective date(s) of the adjustment(s). The Issuer will, to the extent practicable, determine the appropriate adjustment(s) by reference to the adjustment(s) in respect of such Potential Adjustment Event made by an options exchange to options on the relevant Shares or Component Shares (as the case may be) traded on such options exchange.";

- (ii) Equity-Linked Securities Asset Term 2.3 (*Consequences of Extraordinary Events*) shall be deleted in its entirety and replaced with the following:

"If the Issuer determines that an Extraordinary Event has occurred in respect of a Share (the "**Affected Share**") or a Component Share (the "**Affected Component Share**") then, on or after the relevant Merger Date, Tender Offer Date, De-stapling Date or Announcement Date, as the case may be, the Issuer may in its discretion (acting in good faith and in a commercially reasonable manner) either:

- (a) (i) make such adjustment to the exercise, settlement, payment or any other terms of the Securities as the Issuer determines appropriate to account for the economic effect on the Securities of such Extraordinary Event and to preserve the original economic objective and rationale of the Securities (which may include, without limitation, adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Affected Share or the Affected Component Share (as the case may be) or to the Securities), which will, to the extent practicable, be determined by reference to the adjustment(s) made in respect of such Extraordinary Event by an options exchange to options on the Affected Share or Affected Component Share (as the case may be) traded on such options exchange;
- (ii) determine the effective date of that adjustment; and
- (iii) upon making any such adjustment, the Issuer shall give notice as soon as practicable to the Securityholders stating the adjustment to any amount payable under the Securities and/or any of the other relevant terms and giving brief details of the Extraordinary Event, provided that any failure to give such notice shall not affect the validity of the Extraordinary Event or any action taken; or
- (b) if "Share Substitution" is specified as being applicable in the relevant Issue Terms, and:
- (i) if such Extraordinary Event has occurred in respect of an Affected Component Share and the Issuer determines that such Affected Component Share has been replaced by a replacement share (the "**Replacement Component Share**") such that the Share shall comprise such Replacement Component Share and any other remaining Component Share, then the Issuer may, acting in good faith and in a commercially reasonable manner, determine that the Replacement Component Share shall be deemed to be a Component Share in place of the Affected Component Share (and the share issuer of the Replacement Component Share will replace the Component Share Issuer of the Affected Component Share); otherwise
- (ii) the Issuer may, acting in good faith and in a commercially reasonable manner, select a new underlying share (in respect of the relevant Extraordinary Event, the "**Replacement Share**"), which Replacement Share will be deemed to be a Share in place of the Affected Share (and the Share

Issuer of the Replacement Share will replace the Share Issuer of the Affected Share). In selecting a Replacement Share, the Issuer may, but is not obliged to, determine that such Replacement Share will: (i) be selected from the same economic sector(s) as the Affected Share, (ii) have shares denominated in the same currency as the Affected Share, (iii) have a similar market capitalisation to the Affected Share, (iv) be listed on the same Exchange as the Affected Share, and (v) be domiciled in the same country as the Affected Share. In selecting the Replacement Share, the Issuer (where there is a corresponding applicable regulatory obligation) shall also take into account whether fair treatment is achieved by any such selection in accordance with its applicable regulatory obligations.

In selecting a Replacement Share, the Issuer will, to the extent practicable, (A) ensure that the original economic objective and rationale of the Securities is preserved, and (B) take into account (1) the adjustment(s) made in respect of such Extraordinary Event by an options exchange to options on the Affected Share traded on such options exchange, and/or (2) any determinations made by the sponsor of an index which references the Affected Share.

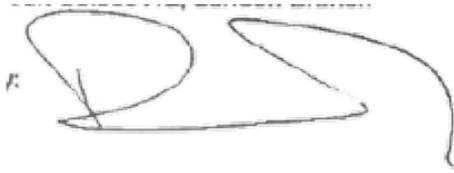

The Issuer may make such adjustment to the exercise, settlement, payment or any other terms of the Securities as the Issuer determines appropriate to account for the economic effect on the Securities of the Extraordinary Event and/or the replacement of the Affected Share by the Replacement Share or the Affected Component Share by the Replacement Component Share (as the case may be) (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or Component Shares (as the case may be) or to the Securities) and to preserve the original economic objective and rationale of the Securities.

Upon making any such replacement and/or adjustment, the Issuer shall give notice as soon as practicable to the Securityholders giving details of the Extraordinary Event and information relating to the Replacement Share or Replacement Component Share (as the case may be), and/or stating the adjustment to any amount payable under the Securities and/or any of the other relevant terms, provided that any failure to give such notice shall not affect the validity of the Extraordinary Event or any action taken; or

- (c) if the Issuer determines that no replacement or adjustments to the terms of the Securities would achieve a commercially reasonable result, on giving notice to Securityholders as soon as practicable in accordance with the General Conditions, the Issuer may redeem the Securities in whole but not in part, in which case the Issuer will cause to be paid to each Securityholder in respect of each Security held by it an amount equal to the Unscheduled Termination Amount on (i) if the relevant Issue Terms specify that "Institutional" is applicable or where the terms of the Securities do not provide for the amount payable at maturity to be subject to a minimum amount or for Instalment Amounts to be payable, such day falling on or after the relevant Merger Date, Tender Offer Date, De-stapling Date or Announcement Date, as the case may be, as selected by the Issuer in its discretion, (ii) otherwise, the due date for redemption. For the avoidance of doubt, no other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer, provided that, in respect of Instalment Securities, each Instalment Amount scheduled to be paid (but unpaid) on an Instalment Date falling on or after the Unscheduled Termination Event Date shall continue to be paid on such Instalment Date."; and
